

COLLEGE OF ARCHITECTURE, ART, AND PLANNING

ADMINISTRATION

Mohsen Mostafavi, dean

W. Stanley Taft, associate dean

Peter Turner, assistant dean of administration and finance

TBA, chair, Department of Architecture

TBA, chair, Department of Art

William Goldsmith, chair, Department of City and Regional Planning

Deborah Durnam, director, admissions

Carol Cooke, director, alumni affairs and development

M. Susan Lewis, director, career services

Leon Lawrence, director, Office of Diversity and Inclusiveness

Margaret N. Webster, director, visual resources facility

Jayne A. LeGro, registrar

FACULTY ADVISORS

Architecture students are assigned faculty advisors and are also invited to share concerns with and seek advice from the most appropriate faculty member or college officer, including the registrar, the department chair, and the dean.

Students in the fine arts department are assigned a faculty advisor for the first year. After the first year, students may select their advisors. Students are required to have an advisor throughout their program in their area of concentration.

Undergraduate students in the Program of Urban and Regional Studies are assigned faculty advisors.

All students in the college are invited to share concerns and seek advice from the volunteer student advisors (EARS) at any time.

DEGREE PROGRAMS

	<i>Degree</i>
Architecture	B. Arch.
	B.F.A.
Fine Arts	B.F.A.
History of Architecture and Urbanism	B.S.
Urban and Regional Studies	B.S.

The college offers programs leading to the bachelor's degree—the five-year program in architecture leads to the bachelor of architecture; four-year programs in art and architecture lead to the bachelor of fine arts. In addition, four-year programs with a concentration in either urban and regional studies or history of architecture lead to the bachelor of science.

Graduate-level programs are offered in art, architectural design and urban design, architectural science, history of architecture and urbanism, historic preservation planning, city and regional planning, regional science, and landscape architecture.

Students in most of these programs work in physical proximity to one another and thus gain a broader understanding of their own special area of interest through contact with students and faculty from other disciplines.

Early in its development, the college set a limit on the number of students it would enroll and devised a selective method of admission. There are now more than 670 students and a full-time teaching staff of over 60, supplemented by visiting professors and critics, part-time lecturers, and assistants. Teachers and students mix freely, and much instruction and criticism is on an individual basis.

The college's courses are integral parts of the professional curricula. Fundamental subjects are taught by faculty members whose experience provides them with professional points of view. The concentration of professional courses within the college is balanced by the breadth of view gained from courses and informal learning in the rest of the university. The college believes that this breadth is an essential element of professional education. This conviction is evident in the form of the curricula, the methods of teaching, and the extracurricular life of teachers and students.

FACILITIES

The college occupies Sibley Hall, Olive Tjaden Hall, Rand Hall, and the Foundry. Facilities for architecture and city and regional planning, as well as college administrative offices, the Visual Resources Facility, and the Fine Arts Library, are located in Sibley Hall. The Department of Art is housed in Olive Tjaden Hall. Sculpture facilities are in the Foundry and architecture design studios and shop facilities are in Rand and Sibley. The Green Dragon Café, a student eatery and lounge, is located in the lower level of Sibley Dome. Darkrooms in the Department of Art are available for general use by students in the college and are used primarily as laboratories for the photography courses. Each user must pay a darkroom fee. Information about darkroom rules and regulations, hours, and equipment is available at the darkroom circulation desk.

Through the generosity of the late Lillian P. Heller, the college also owns the Miller-Heller House, home of William H. Miller, the first student to enroll for the study of architecture at Cornell, and later a practicing architect in Ithaca. This building is used to house visiting teachers and guests of the college and for occasional receptions and social events.

Libraries

The Fine Arts Library in Sibley Hall serves the College of Architecture, Art, and Planning through its collections on architecture, fine arts, city and regional planning, and landscape architecture. The library, with more than 202,000 books, is capable of supporting undergraduate, graduate, and research programs. Some 1,400 serials are currently received and maintained.

The Visual Resources Facility, made possible through gifts from George and Adelaide Knight, is located in Sibley Hall and contains the F. M. Wells Memorial Slide Collection, which consists of a large and growing collection of slides of architecture, architectural history, and art. The collection now includes approximately 500,000 slides.

The facilities of the libraries of other schools and departments on campus and the John M. Olin Library, designed primarily as a research library for graduate students, are also available.

Museums and Galleries

The Herbert F. Johnson Museum of Art was formally opened in May 1973. Although many of its exhibitions and activities relate directly to academic programs of the university, the museum has no administrative affiliation with any department. In this way, its programs freely cross academic boundaries, stimulating interchange among disciplines. With a strong and varied collection and a continuous series of high-quality exhibitions, it fulfills its mission as a center for the visual arts at Cornell. Throughout the year, works of students, faculty, and staff in the College of Architecture, Art, and Planning and of guest artists may be viewed in the John Hartell Gallery in Sibley Dome and in the Olive Tjaden Gallery in Olive Tjaden Hall. Art galleries are also maintained in Willard Straight Hall, where loan exhibitions of paintings and graphic work by contemporary artists are held.

Rome Program

The College of Architecture, Art, and Planning's Rome Program was founded in the fall of 1986 to provide instruction in Italy for students seeking excellence in art, architecture, and other disciplines. The program offers an educational experience that draws upon the rich past of Rome, its resources in museums, its art and architecture, and its wide variety of cultural offerings. The school is located in the restored 17th-century Palazzo Lazzaroni in the center of the eternal city near such well-known Roman sights as Piazza Navona, the Pantheon, and Rome's famous outdoor market at the Campo dei Fiori.

The program in Rome offers components for students majoring in architecture, fine arts, planning, and liberal arts. Full course loads are available to all students in a curriculum that stresses the convergence of artistic, cultural, and architectural ideas vital to an

understanding of the city. Students are responsible for planning course schedules that ensure their particular requirements can be met, since course offerings in Rome are limited. For additional information, see individual department listings or contact the Rome Program office, 149 East Sibley Hall.

New York City Program

The College of Architecture, Art, and Planning has recently expanded to include an off-campus base in downtown Manhattan near Union Square. The facility provides bright, expansive studio and seminar space for both short-term and semester-long use by all three AAP departments.

In this new space, the college can engage New York City artists, architects, urban theorists, and other practitioners to meet with students and faculty members. The facility is also an ideal base for the study of urban policy, for museum and gallery visits, or for exposure to a wealth of architectural history and practice. Through all of these functions, this program adds an invaluable urban component to the AAP experience.

COLLEGE ACADEMIC POLICIES

Ownership of Student Work

All drawings, models, paintings, graphic art, and sculpture done in the studios and drafting rooms as a part of the instructional program are the property of the college until they have been graded and released by the instructor. Certain works may be selected by the college for retention for academic purposes.

Exhibitions of Student Work

Exhibitions of student work are held each semester as part of the yearly schedule of the Olive Tjaden Gallery and the John Hartell Gallery in Sibley Dome. These galleries display work from a specific course or exhibit examples of recent work by individual faculty members, students, and visitors.

Scholastic Standards

Semester by semester, a candidate for an undergraduate degree in this college is required to successfully complete a minimum of 12 credit hours with a grade point average for the semester of not less than C+ (2.3). The record of each student who falls below the standard will be reviewed by the college's Academic Records Committee for appropriate action, among those described below:

1. The student is issued a **Warning**. This means the student's performance is not up to expectations. Unless improvement is shown in the subsequent semester, the student may be placed on **Final Warning** or given a **Required Leave of Absence** from the college.
2. The student is issued a **Final Warning**. This indicates the student's record is unsatisfactory. Unless considerable improvement is shown in the subsequent semester, the student may be given a **Required Leave of Absence** from the college.
3. The student is placed on a **Required Leave of Absence**. The student is dismissed from the college and may not

continue studies in the college. A student who has been placed on a required leave of absence may request to resume studies after a leave of absence of at least two semesters. This request is made by letter addressed to the college dean, chair of the Academic Records Committee, 129 Sibley Hall, Ithaca, NY 14853-6702. The student must submit evidence that time has been well used, and if employed, the student must submit a letter from the employer(s). Students on required leave are not allowed to register extramurally at Cornell, as the intention of the required leave is to insist upon a break from study at Cornell. If a student chooses to enroll in courses at another institution while on a required leave, credit is not granted automatically. Upon receiving permission to return, a student must petition the department and include an official transcript to request credit for courses taken. A return to study in the college after a required leave of absence is at the discretion of the college's Academic Records Committee. Requests for spring semester return must be made by November 15 and requests for fall semester return must be made by April 15. The second required leave of absence is a de facto dismissal and the student will be permanently withdrawn from the college.

4. The student is placed on a **Required Withdrawal**. The student may not reregister in the College of Architecture, Art, and Planning and is dismissed from the college and is permanently prohibited from continuing studies in it.

The required withdrawal action does not prevent the student from applying for admission to another division of the university.

The above actions are not necessarily sequential. A student who has received a warning may be placed on a required leave of absence at the end of the next semester if the performance during that semester is deemed to be grossly deficient.

It is necessary to have a cumulative grade point average of at least 2.0 (C) for graduation.

Leaves of Absence

The College of Architecture, Art, and Planning adopted the following leave of absence policy effective in the fall of 2006:

Leaves of absence will be of four types:

1. **Personal leaves of absence** may be granted for a variety of reasons. The student may request a personal leave of absence no later than the third week of class in the affected term. The department may set conditions for completion of work, new and incomplete course work, community service, or internships while the student is on leave. The term of this type of leave is five years. Following the end of the fifth year, the student will be automatically withdrawn from the college.
2. **Conditional leaves of absence** may be granted for students desiring to take a leave but who are not in good academic standing or they wish to take a leave during the current term. Conditional leaves are at least two semesters in length. The department will

set conditions for completion of work, new and incomplete course work, community service, or internships while the student is on leave. Students may be granted conditional leaves of absence after the twelfth week of the term only in highly extenuating circumstances and with the approval of the student's department and the Academic Records Committee (ARC). The student's academic status is subject to review at the time of the leave and upon the student's return.

3. **Voluntary leaves of absence for medical reasons** may be granted by the college upon the recommendation of Counseling and Psychological Services (CAPS) or Gannett Health Services. They are usually no less than six months in duration. The department may set conditions for completion of work, new and incomplete course work, community service, or internships while the student is on leave. The college may impose additional conditions appropriate to the individual situation. The student's academic status is subject to review at the time of the leave and upon the student's return. Students must receive approval to return from this type of leave, both from CAPS or Gannett as well as the student's department and the ARC.

4. **Required leaves of absence for academic reasons.** The ARC may vote for a required leave if the student is not making satisfactory progress in the degree program (defined by completion of 12 academic credits and 2.3 GPA each term unless there are special circumstances). The department may set conditions for completion of work, new and incomplete course work, community service or internships while the student is on leave. The college may impose additional conditions appropriate to the individual situation. The student's academic status is subject to review at the time of the leave and upon the student's return.

Students on leave types 2 and 4 may not attend any classes at Cornell through the School of Continuing Education and Summer Sessions. Students on leave type 3 may not register for classes at Cornell unless they obtain the permission of the department, the college ARC, and a recommendation from CAPS or Gannett Health Services.

Students who desire to return from any of these leaves shall follow a two-tiered approach. They shall write a letter to their department and to the ARC asking to return to study in the following academic semester (summers may be considered for potential return). The request will be reviewed and approved first by the department. The recommendation of the department will be forwarded to the college ARC for its review and action. If the student request to the department results in a "no pass" outcome, the student may appeal in writing to the Academic Records Committee within two weeks of receipt of the department decision. The final decision then rests with the Academic Records Committee. No appeals will be considered following the decision of the ARC.

It is expected that the department and college committees will review and act on requests to return to study by June 1 for requests to return to study in the fall term and by January 5 for requests to study in the spring term.

ARCHITECTURE COURSES

Course offerings in the college of Architecture, Art and Planning are listed under the various departments. Courses are identified with a standard abbreviation followed by a three-digit number.

For the entering class of 2007, all new students in the college of AAP will be required to complete a 1-credit, interdisciplinary course offered in the fall semester.

AAP 111(1101) The World We Make

Fall and spring. 1 credit. S-U grades. Staff. This course offers AAP first-year students an introduction to the subjects, theories, and methodologies of the disciplines of art, planning, architecture, and landscape architecture. Examples drawn from a range of historical periods as well as contemporary practice highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap.

ARCHITECTURE

TBA, chair (143 East Sibley Hall, 255-5236); L. Chi, M. Cruvellier, M. Curry, F. Davis, W. Goehner, D. P. Greenberg, G. Hascup, K. Hubbell, D. M. Lasansky, B. G. MacDougall, A. B. Mackenzie, L. Mirin, V. Mulcahy, J. Ochshorn, C. F. Otto, A. Ovaska, H. W. Richardson, A. Simitch, V. K. Warke, J. Wells, M. Woods, J. Zissovici

Professional Degree Programs

Cornell offers two professional degrees in architecture: the undergraduate bachelor of architecture and the graduate master of architecture. These degrees count toward the professional registration requirements established by the various states, the National Architectural Accrediting Board, and the National Council of Architectural Registration Boards.

B. Arch.

The undergraduate professional program is normally five years in length and is designed particularly for people who, before they apply, have established their interest and motivation to enter the field. It therefore incorporates both a general and professional educational base.

The program is oriented toward developing the student's ability to deal creatively with architectural problems on analytical, conceptual, and developmental levels. The sequence courses in design, consisting of studio work augmented by lectures and seminars, are the core of the program. Sequences of studies in the history of architecture and cities, culture and society, architectural theory, visual studies, environmental control, structures, construction, and computer applications provide a base for the work in design.

In the first three years, the student has the opportunity to establish a foundation in the humanities and sciences through electives. During the fourth and fifth years, this base may expand through further detailed studies in these areas. Within the professional program a basis for understanding architecture in its contemporary and historical cultural contexts is established.

The structure of the program incorporates considerable flexibility for the individual student to pursue his or her particular interest in the fourth and fifth years. By carefully planning options and electives in the fifth year, it is possible for a qualified student to apply the last year's work for the bachelor of architecture degree to the post-professional M. Arch. II program. Some students are then able to complete the requirements for the master's degree in one additional year.

M. Arch. I

Cornell's graduate professional program is normally three and one-half years long and is intended for students who already have a bachelor's degree in any subject. Information on this professional graduate program may be found on the architecture web site (www.architecture.cornell.edu).

Note on Professional Accreditation

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The NAAB grants candidacy status to new programs that have developed viable plans for achieving initial accreditation. Candidacy status indicates that a program should be accredited within six years of achieving candidacy, if its plan is properly implemented.

Rome Program

The program offers the opportunity for students from Cornell and other universities to spend one or two semesters of study in Rome. This option is open to fourth- and fifth-year Cornell architecture students; outstanding third-year students are admitted by petition and a review of their design record. Courses offered by this department include design, history, theory, architectural science, and visual studies. In addition, courses are offered by other departments in Italian language, Italian culture, art, city and regional planning and history of art. The program provides a unique urban and architectural experience drawing from the rich past of the city for sources of instruction and inspiration.

New York City Program

The goals of the Architecture Program in New York City are to introduce the students to the best of contemporary practice while enabling students to benefit from trans-disciplinary activities achieved by collaboration with the students of other departments and exposure to a multiplicity of practices including art and engineering. Students have the

opportunity to establish connections with significant practices outside of the studio through internships.

Overlap Program

For qualified students, the department offers an option that combines the final semester of the undergraduate program with the first semester of the post-professional master of architecture program. In the fall of the fourth undergraduate year, interested students petition the department to substitute ARCH 711 for ARCH 502. At the same time, they complete graduate school applications and submit them with fee and portfolio to the graduate field assistant for architecture. Students accepted into the program may not begin until the fall following their 501 studio semester and, once enrolled, may not transfer back into the ARCH 501-502 sequence.

Following admission into the Overlap Program, students may petition to apply 9 credits of free electives from their B.Arch. curriculum toward the requirements of the master's degree.

B.Arch. Curriculum

First Year	Credits
<i>Fall Semester</i>	
101 Design I	6
181 History of Architecture I	3
151 Drawing I: Freehand Drawing	2
MATH 111 Calculus or out-of-college elective	3-4
Out-of-college elective	3
AAP 111 The World We Make	1
	18-19
<i>Spring Semester</i>	
102 Design II	6
182 History of Architecture II	3
152 Drawing II: Drawing Systems	2
MATH 106 or 111 or out- of-college elective	3-4
Out-of-college elective (first-year writing seminar suggested)	3
	17-18
Second Year	
<i>Fall Semester</i>	<i>Credits</i>
201 Design III	6
263 Structural Concepts	4
231 Architectural Analysis I	2
262 Building Technology, Materials, and Methods	3
ARCH 253 Drawing III: Digital Media in Architecture or out-of-college elective	2-3
	17-18
<i>Spring Semester</i>	
202 Design IV	6
232 Architectural Analysis II	2
261 Environmental Systems—Site Planning	3
264 Structural Elements	3
ARCH 253 Drawing III: Digital Media in Architecture or college elective	2-3
	16-17

Departmental Semesters Credits

3	history of architecture: 300 level	9
1	visual representation in architecture	3
2	architectural theory or 600-level design-related course	6
1	architectural structures, construction, or environmental systems and conservation	3
		21

College Semesters

2	art: any studio courses (ART 214 will fulfill)	6
1	first-year writing seminar	3
1	mathematics, or physical or biological sciences	3
1	humanities	3
		12

Free

Of the electives, 15 credits are to be taken outside the College of Architecture, Art, and Planning, and 15 credits may be taken either in or outside the college. One of these must be AAP 111.	30
Total credits	176

Architecture Concentrations for Majors

The Department of Architecture recognizes any concentration earned within the university but outside of the department (using standards set by those departments) on the transcripts of its students.

It is often advantageous for undergraduates to concentrate in specific subdisciplines of architecture, especially if they anticipate application to specialized graduate programs; therefore, the following concentrations in architecture are offered within the department for B. Arch. and B.F.A. in architecture candidates only:

Architecture, Culture, and Society 342 (or equivalent), plus 9 credits in this area.
Architectural Science and Technology 261, 262, 263, 264, 361, 362, 363, distribution requirement (3 credits), plus 6 credits in this area.
History of Architecture 181, 182, distribution requirements (9 credits), plus 7 credits

(including a 4-credit seminar course) in this area.

Theory of Architecture 231, 232, distribution requirements (6 credits), plus 6 credits in this area.

Visual Representation in Architecture 151, 152, distribution requirement (3 credits), plus 9 credits in this area.

Students wishing to receive recognition for a concentration must submit a concentration request form to the Architecture Department office. For a course to count toward a concentration, the student must receive a grade of C or better.

Transfer Students

Although the program leading to the bachelor of architecture is directed specifically to those who are strongly motivated to begin professional study when entering college, it is sufficiently flexible to allow transfers for students who have not made this decision until after they have been in another program for one or two years. Individuals who have already completed a nonprofessional undergraduate degree may apply to the professional M. Arch. I program.

Transfer students are responsible for completing that portion of the curriculum which has not been covered by equivalent work. Applicants who have had no previous work in architectural design must complete the 10-semester design sequence. Since this sequence may be accelerated by attending summer semesters, seven or eight regular semesters and two or three summer terms are typically required.

Admission is offered to a limited number of transfer applicants who have completed a portion of their architecture studies in other schools. Each applicant's case is considered individually. Transfer students must complete a minimum of 70 credits and four semesters in residence, taking 35 of the 70 credits (including four semesters of design) in the Department of Architecture. Placement in the design sequence is based on a review of a representative portfolio of previous work.

For those who would benefit from an opportunity to explore the field of architecture before deciding on a commitment to professional education, the department offers an introductory summer program that includes an introductory studio in architectural design, lectures, and other experiences designed to acquaint participants with opportunities, issues, and methods in the field of architecture.

Alternative Programs

Bachelor of Fine Arts

After completing the first four years of requirements, the student may choose to receive the degree of bachelor of fine arts (B.F.A.) in architecture, which is not a professional degree.

Bachelor of Science in History of Architecture

The history of architecture major leads to a bachelor of science degree, conferred by the College of Architecture, Art, and Planning. The major is intended for transfer students from other programs at Cornell and from colleges and universities outside Cornell. Students in the Department of Architecture

and the College of Arts and Sciences may take the major as part of a dual-degree program. The course of study in this major, available to students from a variety of academic backgrounds, offers the opportunity for a vigorous exploration of architecture and its history.

Admission requirements. Two years of undergraduate study, ARCH 181 and 182 or the equivalent. Students transferring from a B. Arch. program must be in good standing in their design sequence.

Procedure. Students from Cornell may transfer to the program at the beginning of the fall semester of their third or fourth year of study. They submit a short application as prospective internal transfer students. Before applying, all prospective internal transfer students meet with a history of architecture faculty member to discuss scheduling for the program.

All students who wish to enter the program, either from Cornell or other institutions, must apply by November 15 for spring admission or by March 31 for fall admission.

Applications for both internal and external transfer students are available from the Admissions Office, College of Architecture, Art, and Planning, Cornell University, B-1 West Sibley Hall, Ithaca, NY 14853-6702. Completed applications must be submitted to the Admissions Office.

Curriculum. A student entering the program is assigned an advisor from the history of architecture faculty in the Department of Architecture. Advisor and student together prepare an appropriate two-year course of study according to the following guidelines:

1. 24 credits of 300-level courses in architectural history: ARCH 380 through 399
2. 12 credits in 600-level architectural history seminars: ARCH 681 through 699; or 8 credits in a 600-level seminar plus ARCH 499, offered for honors candidates only
3. One 300-, 400-, or 600-level course in architectural theory
4. 24 credits in electives selected in consultation with the student's advisor
5. Language requirement, to be met in the manner specified for students enrolled in the College of Arts and Sciences

Honors program. Students graduate with honors if, during their two years of study in the program, they have a cumulative average of B or better in all courses, have no grade lower than A- in all history of architecture courses taken at the 300 level, and have completed an honors thesis (ARCH 499) deemed to be of distinguished quality by the history of architecture faculty.

Dual-Degree Options

Students can earn both the B.S. and B. Arch. degrees either simultaneously or sequentially. Students who have transferred into the B. Arch. program at Cornell may find this to be a special opportunity for an enlarged and enriched program of study.

Students currently enrolled in the College of Arts and Sciences at Cornell can earn a B.A. in an arts college major and a B.S. in the history of architecture in five years. In this option, students complete a minimum of 150 credits, which includes the B.S. prerequisites and curriculum requirements and 100 credits

of the usual distribution and major requirements in the College of Arts and Sciences. Further information about this option is available at the Admissions Office, B-1 West Sibley Hall, and at the Academic Advising Center of the College of Arts and Sciences, 55 Goldwin Smith Hall.

Students may also elect to continue toward a master of arts degree in the history of architecture. The M.A. ordinarily requires a minimum of two years of graduate work beyond the bachelor's degree; with this special sequential degree arrangement that time is shortened to one year.

Summer Term in Architecture

The summer term offers students the opportunity of a concentrated period of design work; the term is six to eight weeks in duration.

Undergraduate design sequence courses, excluding 101 and 502, are offered in Ithaca. Normally there is also a design program abroad for third-, fourth-, and fifth-year students.

Students from schools of architecture other than Cornell are welcome to enroll in any summer program.

Other department courses may be offered as elective courses, contingent upon student interest, faculty availability, and departmental approval.

The department offers a Career Explorations in Architecture Program for high school students and college students considering a professional education in architecture.

Concentration in Architecture for Nonmajors

A special concentration has been formulated specifically for those students not enrolled in the Department of Architecture but who are interested in complementing their current academic program with an introduction to various facets of architectural studies. Some students may wish to use the Concentration in Architecture for Nonmajors as a means of investigating possible graduate studies in architecture. Some may wish to develop architectural specialties within other disciplines. Students meeting the requirements for this concentration should complete a concentration form, which is available in the architecture department office. This form, when validated by the architecture department and the AAP college registrar, serves as evidence of completion of the concentration requirements. Students should consult their individual college registrars for information about whether their home college recognizes and notes such concentrations on transcripts or diplomas.

The curriculum for students in the Concentration in Architecture Program totals 14 credit hours minimum, including 8 credits of required courses and 6 credits of elective courses. Grades earned must be C or better in all courses.

Required courses. A minimum of 8 credits, including one design studio, one visual studies course (e.g., drawing), and one history of architecture course. For example,

ARCH 110 Introduction to Architecture Design Studio (offered summer only) 3 credits

or

ARCH 103 Elective Design Studio (offered fall only, not offered every year) 6 credits

(ARCH 103 may substitute for ARCH 110; students who complete ARCH 103 must take all other course requirements for the concentration.)

ARCH 151 Drawing I (fall only) 2 credits

ARCH 181 or 182 History of Architecture I or II (ARCH 181, fall; ARCH 182, spring) 3 credits

Departmental elective courses: A minimum of 6 credits, including two departmental elective courses, are required.

Professional Master of Architecture

Mission Statement

Consistent with the broader mission of the Department of Architecture, the Master of Architecture program is dedicated to preparing graduate students from diverse disciplines and backgrounds for careers in architecture. The program is committed to the view that the nature of contemporary practice must be continually investigated and reassessed in today's globally expansive and technologically dynamic context. The program places the question of practice at the center of the learning process. It posits alternative models and methods of research and seeks to empower the student's sense of inquiry, responsibility, and creativity as she or he formulates her or his unique professional trajectory. The program aims in particular to engage the unique strengths and needs of the graduate student: her or his maturity, commitment to architecture, and the wealth and variety of academic and life experiences she or he brings to the discipline. The pedagogy sets skills and knowledge essential to the profession in a context of emergent cultural, technical, and environmental concerns that characterize the expanded field of architecture in the 21st century.

Curriculum

Term One	Units/Credit Hours	
ARCH 511	Core Design Studio I	6
ARCH 551	Analog/Freehand Constructed Drawing	3
ARCH 531	Theories and Analyses of Architecture I	3
ARCH 563	Structural Concepts	4
ARCH 581	History of Architecture I	3
		19

Term Two

ARCH 512	Core Design Studio II	6
ARCH 552	Analog/Digital Constructed Drawing	3
ARCH 532	Theories and Analyses of Architecture II	3
ARCH 564	Structural Elements	3
ARCH 582	History of Architecture II	3
		18

Term Three

ARCH 513	Core Design Studio III	6
ARCH 661	Environmental Systems I: Thermal Environmental Systems	3
ARCH 562	Building Technology, Materials, and Methods	3
	History Elective or Theory Elective*	3
	Visual Representation Elective	3
		18

Term Four

ARCH 514	Core Design Studio IV	6
ARCH 662	Environmental Systems II: Building Systems Integration	3
ARCH 663	Structural Systems	3
ARCH 542	Architecture, Culture, Society Open Elective	3
		18

Term Five

ARCH 515	Core Design V: Integrative Design Practices	6
ARCH 521	Professional Practice	3
ARCH 811	Proseminar in Design Research	3
	History or Theory or Visual Representation Elective*	3
		15

Term Six

ARCH 516	Vertical Design Studio	6
	Visual Representation Elective	3
	Open Elective	3
	History or Theory or Visual Representation Elective*	3
		15

Term Seven

ARCH 812	Independent Design Thesis	9
	Open Elective	3
		12
	Total Units/Credit Hours	115

* Total required for graduation:

- 1 Theory elective
- 1 History elective
- 1 Theory or History elective
- 2 Visual Representation electives

Architectural Design

Courses in brackets are not offered this year.

Each student in the architecture program (undergraduates, graduates, New York City Program, and Rome Program participants) is charged a fee each semester to help defray the continuing costs of refurbishing and replacing equipment.

Sequence Courses

ARCH 101(1101) Design I

Fall, spring. 6 credits. Prerequisite: department students. Staff.
Introduction to design as a conceptual discipline directed at the analysis, interpretation, synthesis, and transformation of the physical environment. Exercises are aimed at developing an understanding of the issues, elements, and processes of environmental design.

ARCH 102(1102) Design II

Spring. 6 credits. Prerequisite: department students; ARCH 101 and 151. Staff.
Continuation of ARCH 101. Covers human, social, technical, and aesthetic factors related to space and form. Design problems range from those of the immediate environment of the individual to that of small social groups.

ARCH 201-202(2101-2102) Design III and IV

Fall and spring. 6 credits each semester. Prerequisites: department students; ARCH 151-152; for ARCH 201, ARCH 102 and 152; for 202, ARCH 201. Corequisite: ARCH 231-232. Staff.

ARCH 301-302(3101-3102) Design V and VI

Fall and spring. 6 credits each semester. Prerequisites: department students; for ARCH 301, ARCH 202; for 302, ARCH 301. Staff.

ARCH 401-402(4101-4102) Design VII and VIII

Fall and spring. 6 credits each semester. Prerequisite: department students; for ARCH 401, ARCH 302 and 362; for 402, ARCH 401. Staff.

Programs in architectural design, urban design, or architectural technology and environmental science and topical studies.

ARCH 501(5101) Design IX

Fall or spring. 6 credits. Prerequisite: department students; ARCH 402. Corequisite: ARCH 510. Staff.

Programs in architectural design, building typology investigations, and research leading to complete development of the student's thesis program. General instruction in the definition, programming, and development of a thesis.

ARCH 502(5902) Design X—Thesis

Fall or spring. 8 credits. Requirement for B. Arch. candidates who must satisfactorily complete a thesis. Students accepted for admission to Overlap Program are exempt from thesis requirement. Prerequisite: ARCH 501 and 510. Staff.

Graduate Courses

ARCH 511(5111) Core Design Studio I

Fall. 6 credits.
Introduction to fundamental concepts of architectural design and representation, including preliminary notions of site, program, context. Emphasis on interpretive, analytical, and generative uses of drawing and physical modeling in the design process.

ARCH 512(5112) Core Design Studio II

Spring. 6 credits. Prerequisite: ARCH 511.
Continuation of subjects developed in the first term. Emphasis on interpretive, analytical, and generative uses of digital media.

ARCH 513(5113) Core Design Studio III

Fall. 6 credits. Prerequisite: ARCH 512.
Focus on issues of program and architectonics in the design of a complex building type in context; introduction to site planning.

ARCH 514(5114) Core Design Studio IV

Spring. 6 credits. Prerequisite: ARCH 513.
Focus on architecture's expanded sites: social, cultural, material, and/or environmental considerations of building in a complex urban landscape.

ARCH 515(5115) Core Design Studio V: Integrative Design Practices

Fall. 6 credits. (New York City). Prerequisites: ARCH 514, 562, 564, 661, 662, 663.

Focus on the development of architectural ideas in constructed, material form. The studio explores emergent topics and constructive methods in contemporary architectural practice. Design study includes the creation of a comprehensive set of representations that describes an architectural project in detail. Students work in collaborative groups and in consultation with advisors drawn from professional practice to develop a project that engages a complex range of topical areas, including: structural and environmental systems, building envelope systems, materiality and construction, life-safety planning, and sustainability.

ARCH 516(5116) Vertical Design Studio

Spring. 6 credits. Prerequisite: ARCH 515.
Open to professional and post-professional M. Arch. students. The vertical studios are topical in nature, and engage contemporary issues in architectural practice and research.

ARCH 711(7111) Design A

Fall. 6 credits. Staff.
Exploration of themes, methods, and technologies in contemporary design.

ARCH 712(7912) Design B: Topics Studio

Spring. 6 credits. Staff.
Graduate vertical research studio.

ARCH 801(8901) Thesis or Research in Architectural Design

Fall or spring. 9 credits. Prerequisite: ARCH 701-702. Staff.
Second-year design course for M. Arch. II students whose major concentration is architectural design.

ARCH 802(8902) Thesis or Research in Urban Design

Fall or spring. 9 credits. Prerequisite: ARCH 703-704. Staff.
Second-year design course for M. Arch. II students whose major concentration is urban design.

ARCH 811(8911) Proseminar in Design Research

Spring. 3 credits. Prerequisites: ARCH 531 and 532.

ARCH 811 offers a synthesis of design and research methods for the development of an independent thesis proposal. Course work includes exposure to different theories and practices of design inquiry, explorations of critical positions for individual development, and preparation of a document encapsulating research leading to a thesis proposition. Successful completion of the course, which includes approval of the thesis document, is a prerequisite for advancement into ARCH 812: Independent Design Thesis.

ARCH 812(8912) Independent Design Thesis

Fall. 9 credits. Prerequisites: ARCH 811, 516.

An independent design project on a topic selected and developed by the student and researched in ARCH 811. Marking the transition between academic and professional practices, the thesis project is an opportunity for each student to define an individual position with regard to the discipline of architecture.

ARCH 813(8913) Design C: ADR Project

Summer. 9 credits. Staff.

Development of a design project in the student's territory of investigation.

Elective Design Courses**ARCH 103-104(1103-1104) Elective Design Studio**

103, fall; 104, spring. 6 credits each semester. Prerequisite: nonarchitecture students; for ARCH 103, permission of instructor; for ARCH 104, ARCH 103 and permission of instructor. Staff.

ARCH 200, 300, 400, 500(2100, 3100, 4100, 5100) Elective Design Studio

Fall, spring, or summer. 6 credits. For transfer students and students who are not architecture majors at Cornell.

Prerequisite: permission of department office. Each student is assigned to a class of appropriate level. Staff.

Nonsequence design used as temporary placement of transfer students, off-campus foreign programs for third-year students (summer and Rome) and for incompletes in design sequence. In some cases student must petition to convert elective design into sequence design.

ARCH 503(5103) Design IXa

Fall and spring. 6 credits. Limited to department students. Prerequisites: ARCH 402 and passing, but nonadvancing, grade in ARCH 501.

Structured studio for those needing to retake ARCH 501. The course operates within the fourth-year design studios.

ARCH 504(5104) Design Xa

Fall, spring, or summer. 6 credits. Limited to department students. Prerequisite: ARCH 503 and passing, but nonadvancing, grade in ARCH 502.

A structured studio for those needing to take an alternative to design thesis. This course operates within the fourth-year design studio.

Related Courses and Seminars**ARCH 110(1110) Introduction to Architecture: Design Studio**

Summer. 3 credits. Open to non-architecture majors in college, high school students in 11th and 12th grades, and any individuals with a minimum of a high school diploma interested in exploring the field of architecture. S-U option. Not offered every year. Staff.

Designed to introduce students to ideas, principles, and methods of solving architectural problems in a studio setting. Through a graduated sequence of exercises culminating in a major semester project, students explore the architectural concepts of space, form, function, and technology. Instruction is via highly personalized critiques of individual student work by assigned department faculty members, as well

as periodic reviews of the group by invited faculty and guest critics. The grade is based on the overall performance in the studio with special emphasis on the quality of a major studio project.

ARCH 111(1111) Concentration in Architecture: Design Studio

Summer only. 3 credits. Subject to enrollment. Prerequisite: non-architecture students. Not offered every year. Staff.

Designed to introduce students to ideas, principles, and methods of solving architectural problems in a studio setting. Through a graduated sequence of exercises culminating in a major term project, students explore the interrelationship of the architectural concepts of space, form, function, and technology. Instruction includes critiques of individual student work by department faculty, as well as by periodic reviews by guest critics.

ARCH 303(3103) Special Problems in Architectural Design

Fall or spring. Variable credit; max. 3. Does not count for design sequence credit. Prerequisite: permission of instructor and approved independent study form. Staff.

Independent study.

ARCH 306(3106) Praxis: Community Design Workshop (also ARCH 606(6106))

Fall or spring. 3 credits. Prerequisite: permission of instructor. Not offered every year. F. Davis.

Workshop-based, hands-on course directed to underserved local and global communities that seek to improve the quality of life for all citizens. It is an interdisciplinary, service-learning course that challenges the usual definition and separation of practice and theoretical research. Services are provided collaboratively to not-for-profit agencies, civic and governmental groups, as well as community-action groups to support sustainable design solutions. The course teaches professional work proficiency, and emphasizes teamwork as well as written, verbal, and graphic communication skills to negotiate the public realm.

ARCH 313(3113) Furniture Design

Fall or spring. 3 credits. Limited enrollment. Students who wish to earn arch visual representation credit must enroll in sec 01; arch technology credit, sec 02; and in-college elective credit, sec 03. Prerequisite: permission of instructor. Not offered every year. G. Hascup.

Explores the history, design, and materiality of furniture. Analyses of materials and joinery-connective systems are developed in parallel with ergonomic restraints. Design transformation occurs through cycles of conceptual alternatives (models and drawings), increasing in scale as the idea evolves. Full-scale prototypes and detailed tectonic drawings are required on three pieces.

ARCH 317(3117) Contemporary Italian Culture

Fall or spring. Variable credit; max. 3. Prerequisite: Rome Program participants. Staff.

Provides a broad view of the culture and social structure of Italy, drawing from Italian literature, history, and current events.

ARCH 510(5110) Thesis Proseminar

Fall and spring. 3 credits. Prerequisite: ARCH 402. Staff.

Lectures, seminars, and independent research leading to complete development of the student's thesis program. General instruction in the definition, programming, and development of a thesis.

ARCH 521(5201) Professional Practice

Fall or spring. 3 credits. Staff.

Examination of organizational and management theories and practices for delivering professional design services. Includes a historic overview of the profession and a review of the architect's responsibilities from the precontract phase through construction. Application of computer technology in preparing specifications.

ARCH 522(5202) Professional Seminar

Fall or spring. 3 credits. Prerequisite: ARCH 521. Staff.

Visits to public and private agencies and architectural firms. Discussions relative to the various aspects of each firm's practice and the identification of agency roles.

ARCH 605(6105) Special Problems in Design

Fall and spring. Variable credit; max. 3. Does not count toward design sequence credit. Prerequisite: permission of instructor. Staff.

Independent study.

ARCH 606(6106) Praxis: Community Design Workshop (also ARCH 306(3106))

Fall or spring. 3 credits. Prerequisite: permission of instructor. Not offered every year. F. Davis.

For description, see ARCH 306.

ARCH 610(6110) Graduate Design Seminar

Fall. 3 credits. Intended for, but not limited to, graduate students in Architectural Design and Urban Design Program. Not offered every year. Staff.

A companion seminar developing themes explored in Arch 711.

ARCH 611-612(6111-6112) Urban Housing Developments

611, fall; 612, spring. 3 credits each semester. Prerequisite: fourth- and fifth-year students in architecture and graduate students; permission of instructor. Not offered every year. Staff.

Architectural Theory**ARCH 130(1300) An Introduction to Architecture: Lectures**

Summer. 3 credits. Open to non-architecture majors in college, high school students in 11th and 12th grades, and anyone with minimum of a high school diploma interested in exploring the field of architecture. S-U or letter grades. Not offered every year. Staff.

Survey course that covers the many facets of architecture: history, design principles, preservations, landscape architecture, building technology, and cultural factors. Course format comprises lectures, demonstrations, films, and field trips. Evaluation is based on quizzes and a final exam.

ARCH 131(1301) An Introduction to Architecture

Fall. 3 credits. Open to out-of-department students only. ARCH 131 is not a prerequisite for ARCH 132. Staff.

Intended to familiarize non-architecture students with the art and science of architecture. The fundamentals of plan, section, and elevation, the primary elements that comprise an architectural form; basic organizational principles; the ways in which we perceive architectural space; and the various concepts of function in relation to form will be included among the topics to be covered, using examples from numerous times and cultures as well as from contemporary Cornell campus.

ARCH 231(2301) Architectural Analysis I

Fall. 2 credits. Corequisite: for architecture students, ARCH 201. Staff.

Introduction to analysis of the object of study in the interest of broadening one's understandings of the ways in which architecture can connote and denote meanings.

ARCH 232(2302) Architectural Analysis II

Spring. 2 credits. Corequisite: for architecture students, ARCH 202. Staff.

Advanced analytical studies focusing on complex architectural spaces, objects, images, and representations.

ARCH 334(3304) Column, Wall, Elevation, Facade: A Study of the Vertical Surface in Architecture (also ARCH 634(6304))

Fall or spring. 3 credits. Prerequisite: third-year students and above. J. Wells. Field and figure relationships (interrelation of parts dominated by the general character of the whole) are the general themes for studying numerous issues relevant to the design of elevations and facades. The first part of the semester is a lecture/seminar format. Students are required to research and present a paper for discussion. In the latter part of the semester, students do exercises to demonstrate their understanding of the issues addressed.

ARCH 337(3307) Special Investigations in the Theory of Architecture I

Fall or spring. Variable credit, max. 3. Prerequisite: permission of instructor and approved independent study form. Staff. Independent study.

ARCH 338(3308) Special Topics in the Theory of Architecture I

Fall or spring. 3 credits. Prerequisite: permission of instructor. Not offered every year. Staff. Topic TBA.

ARCH 339(3309) Elements, Principles, and Theories in Japanese Architecture

Spring. 3 credits. Not offered every year. L. Mirin. Examination of Japanese architecture (buildings and gardens) and their contexts: landscapes, settlements, and cities. The course is addressed to those interested in Japanese architecture as a manifestation of Japanese culture and as a subject for analysis. Emphasis is on underlying concepts, ordering principles, formal typologies, space and its representation, perceptual phenomena, and symbolic content. Readings focus on

theoretical treatments of these aspects by Japanese and western writers.

[ARCH 431(4301) Theory of Architecture]

ARCH 432(4302) Theory of Architecture

Fall or spring. 3 credits. Prerequisite: upper-level students. Not offered every year. Staff.

Development of urban form, urban intervention, contextualism, ideal cities, historic new towns, streets, piazzas, fortifications, public buildings and social housing types, site planning, and transportation.

ARCH 435(4305) Architecture and Representation

Fall or spring. 3 credits. Prerequisite: degree candidates in architecture; successful completion of ARCH 231-232. Not offered every year. Staff.

Study of architecture as it functions as a representational art, referring to its past while inferring its present.

ARCH 531(5301) Theories and Analyses of Architecture I

Fall. 3 credits. Introduces students to influential critical and creative themes in modern architecture. Topics cover influential 20th-century discourses and practices prior to the 1960s, the questions and contexts that they engage, and their implications for contemporary thinking and design. Discussions and assignments aim at developing critical and graphical readings of both works and writings.

ARCH 532(5302) Theories and Analyses of Architecture II

Spring. 3 credits. Prerequisite: ARCH 531. Continuation of ARCH 531 focusing on themes in architectural discourse, design, and inquiry from the 1960s to the present, and their creative/critical implications.

ARCH 631(6301) Design Research

Fall. 3 credits. Staff. Introduction to themes of inquiry in contemporary architecture, including critical motives in research, topical "problems," and materials and tactics of investigation.

ARCH 634(6304) Column, Wall, Elevation, Facade: A Study of the Vertical Surface in Architecture (also ARCH 334(3304))

Fall or spring. 3 credits. Prerequisite: third-year students and above. J. Wells. For description, see ARCH 334.

ARCH 635(6305) Theory and Criticism in Architecture

Fall or spring. 3 credits. Prerequisite: permission of instructor. Not offered every year. Staff. Inquiry into the fundamental principles of architectural criticism in theory and practice, with emphasis on the structures of criticism in the 20th century.

ARCH 637(6307) Special Investigations in the Theory of Architecture II

Fall or spring. Variable credit; max. 4. Prerequisite: permission of instructor and approved independent study form. Staff. Independent study.

ARCH 638(6308) Special Topics in the Theory of Architecture II

Fall or spring. 3 credits. Prerequisite: permission of instructor. Not offered every year. Staff. Topic TBA.

Architecture, Culture, and Society

ARCH 342(3402) Architecture as a Cultural System (also ARCH 542(5402))

Fall or spring. 3 credits. Can substitute ARCH 445, 446, 447, or 448 by permission of instructor. B. MacDougall.

What have been the major issues in the theory and practice of architectural design through time and across cultures, and how is aesthetic judgment related to more general systems of ordering within a particular society or group? This course draws on concepts, methods, and findings from the broad field of cultural anthropology to address these questions. Case studies and examples are drawn from a wide range of architectural traditions around the world for which there is significant ethnographic literature, with special emphasis on sub-Saharan Africa, India, and the United States. Topics include the ideational and formal relationships between folk and monumental traditions in complex societies; the structure of the ideal social order and its refraction in the material world; cosmological models and architectural form; geometries of non-Western traditions; and the relationship between indigenization and culture change.

ARCH 349(3409) Undergraduate Investigations in Architecture, Culture, and Society

Fall or spring. Variable credit; max. 3. Prerequisite: permission of instructor and approved independent study form. B. MacDougall. Independent study.

ARCH 441-442(4408-4418) Special Topics in Architecture, Culture, and Society

Fall and spring. 3 credits each semester. Prerequisite: permission of instructor. B. MacDougall. Topic TBA.

ARCH 445(4405) Architecture and the Mythic Imagination

Fall. 3 credits. Prerequisite: ARCH 342 or permission of instructor. Not offered every year. B. MacDougall.

ARCH 447(4407) Architectural Design and the Utopian Tradition

Fall. 3 credits. Prerequisite: ARCH 342 or permission of instructor. Not offered every year. Staff.

ARCH 542(5402) Architecture, Culture, and Society

Spring. 3 credits. What have been the major issues in the theory and practice of architectural design through time and across cultures, and how is aesthetic judgment related to more general systems of order within a particular society or group? This course draws on concepts, methods, and findings from the broad field of cultural anthropology to address these questions. Case studies and examples are drawn from a wide range of architectural traditions around the world for which there is significant ethnographic literature, with

special emphasis on sub-Saharan Africa, India, and the United States. Topics include the ideational and formal relationships between folk and monumental traditions in complex societies; the structure of the ideal social order and its refraction in the material world; cosmological models and architectural form; geometries of non-Western traditions; and the relationship between indigenization and culture change.

ARCH 647-648(6401-6402) Architecture in Its Cultural Context I and II
647, fall; 648, spring. 4 credits each semester. Prerequisite: permission of instructor. Not offered every year.
B. MacDougall.

ARCH 649(6409) Graduate Investigations in Architecture, Culture, and Society
Fall or spring. Variable credit; max. 4. Prerequisite: permission of instructor and approved independent study form.
B. MacDougall.
Independent study.

Visual Studies

ARCH 151(1501) Drawing I: Freehand Drawing
Fall. 2 credits. Staff.
Freehand drawing with emphasis on line as a means of visualizing form and space in architecture.

ARCH 152(1502) Drawing II: Drawing Systems
Spring. 2 credits. Prerequisite: ARCH 151 or permission of instructor. Staff.
Concepts and methods of visualization and representational drawing systems used in architecture. Orthogonal projection, line weight, paraline projection, shade and shadow, and perspective.

ARCH 253(2503) Drawing III: Digital Media in Architecture
Fall or spring. 2 credits. Prerequisite: ARCH 152 or permission of instructor. Letter grades only.
Introduction to two- and three-dimensional digital media in architecture and its potential for visualization, representation, and analysis.

ARCH 450(4500) Architectural Publications
Fall or spring. Variable credit; max. 3. May be repeated for credit.
Colloquy and practicum on issues related to the production of an architectural journal, as well as other theoretical and practical production issues related to the exchange of architectural ideas. Exercises cover both theoretical as well as hands-on aspects of architectural publication.

ARCH 458(4508) Special Investigations in Visual Representation
Fall or spring. Variable credit; max 3. Prerequisites: permission of instructor and approved independent study form. Staff.
Independent study.

ARCH 459(4509) Special Topics in Visual Representation I
Fall or spring. 3 credits. Prerequisite: permission of instructor. Staff.
Topics TBA.

ARCH 551(5511) Techniques in Visual Representation I: Analog/Freehand and Constructed Drawing
Fall. 3 credits.

Focuses on hand drawing and sketching as vehicles for design thinking and perception. Observational, analytical, and transformational exercises develop creative proficiency in freehand drawing, line drawing, and orthographic projection.

ARCH 552(5512) Techniques in Visual Representation II: Analog/Digital Constructed Drawing
Spring. 3 credits. Prerequisite: ARCH 551 or approved equivalent.

Develops understanding of, and proficiency in projective drawing, including paraline and perspective representation in both analog and digital forms. Students are also introduced to a variety of digital representation applications, including modeling, rendering, and animation.

ARCH 658(6508) Special Investigations in Visual Representation II
Fall or spring. Variable credit; max. 4. Prerequisites: permission of instructor and approved independent study form. Staff.
Independent study.

ARCH 659(6509) Special Topics in Visual Representation II
Fall or spring. 3 credits. Prerequisite: permission of instructor. Staff.
Topics TBA.

Architectural Science and Technology

Structures

ARCH 263(2603) Structural Concepts
Fall. 4 credits. Prerequisite: MATH 111 or approved equivalent. M. Cruvellier.
Fundamental concepts of structural behavior. Statics and strength of materials. Introduction to and analysis of simple structural systems.

ARCH 264(2604) Structural Elements
Spring. 3 credits. Prerequisite: ARCH 263. J. Ochshorn or staff.
Concepts and procedures for the design of individual structural components (e.g., columns, beams) in steel, concrete, and timber construction.

ARCH 363(3603) Structural Systems
Fall or spring. 3 credits. Prerequisite: ARCH 264. M. Cruvellier.
Concepts and procedures for the design of overall structural framing systems in steel, concrete, and timber construction.

ARCH 364(3604) Vertigo Structures (also ARCH 664(6604))
Fall or spring. 3 credits. Prerequisite: ARCH 363 or equivalent. Limited enrollment. Not offered every year.
M. Cruvellier.

ARCH 365(3605) Bridge Design (also ARCH 665(6605))
Fall or spring. 3 credits. Limited enrollment. Prerequisite: ARCH 363 or equivalent. Not offered every year. M. Cruvellier.
The major visual impact of bridges on the built environment cannot be denied. And yet, during the past century, architects have virtually abandoned their historical role in the design of these structures. Engineers, on the other hand, have claimed bridge design as their responsibility and have hailed it as evidence of structural art. Are the basic principles of bridge design such that this

situation makes sense for our society? Or is a rethinking of the manner in which bridges are designed called for? Students examine and experiment with the design of bridge structural forms, not only in terms of what is technically feasible but also, with equal emphasis, in the context of aesthetic, historical, and social considerations. Weekly meetings include lectures, discussion seminars, and studio-type design reviews.

ARCH 463(4603) Special Topics in Structures
Fall or spring. 3 credits. Limited to 30 students. Prerequisites: ARCH 263, 264, and 363 or permission of instructor. Not offered every year. Staff.
Topics TBA.

ARCH 473(4609) Special Investigations in Structures
Fall or spring. Variable credit; max. 3. Prerequisite: permission of instructor and approved independent study form. Staff.
Independent study.

ARCH 563(5603) Structural Concepts
Fall or spring. 3 credits. Prerequisite: M. Arch. I students or permission of instructor. Staff.
For description, see ARCH 263.

ARCH 564(5604) Structural Elements
Fall or spring. 3 credits. Prerequisite: M. Arch. I students or permission of instructor. Staff.
For description, see ARCH 264.

ARCH 663(6603) Structural Systems
Fall or spring. 3 credits. Prerequisite: M. Arch. I students or permission of instructor. Staff.
For description, see ARCH 363.

ARCH 664(6604) Vertigo Structures (also ARCH 364(3604))
Fall or spring. 3 credits. Prerequisite: ARCH 563 or equivalent. Limited enrollment. Not offered every year.
M. Cruvellier.
For description, see ARCH 364.

ARCH 665(6605) Bridge Design (also ARCH 365(3605))
Fall or spring. 3 credits. Limited enrollment. Prerequisite: ARCH 363 or equivalent. Not offered every year. Staff.
For description, see ARCH 365.

Construction

ARCH 262(2602) Building Technology, Materials, and Methods
Fall. 3 credits. J. Ochshorn.
Properties of materials—their use and application to the design of buildings and building systems. Discussion of various methods of building construction and assembly.

ARCH 367(3607) Working Drawings (also ARCH 667(6607))
Fall or spring. 3 credits. Prerequisite: ARCH 262 or equivalent. Limited enrollment. Not offered every year.
J. Ochshorn.

ARCH 465(4605) Special Topics in Construction
Fall or spring. 3 credits. Limited to 30 students. Prerequisite: ARCH 262 or permission of instructor. Not offered every year. Staff.
Topics TBA.

ARCH 475(4604) Special Investigations in Construction

Fall or spring. Variable credit; max. 3.
Prerequisite: permission of instructor and approved independent study form. Staff.
Independent study.

ARCH 562(5602) Building Technology, Materials, and Methods

Fall or spring. 3 credits. Prerequisite: M.Arch I students or permission of instructor. Staff.

For description, see ARCH 262.

ARCH 667(6607) Working Drawings (also ARCH 367[3607])

Fall or spring. 3 credits. Prerequisite: ARCH 262 or equivalent. Limited enrollment. Not offered every year. J. Ochshorn.

Environmental Systems and Conservation

ARCH 261(2601) Environmental Systems I—Site Planning

Spring. 3 credits. Staff.
Basic principles involved in design in the outdoor environment. A brief historical perspective. A development of inventory including grading and drainage. Foundations, surfacing, and construction.

ARCH 361(3601) Environmental Systems II—Thermal Environmental Systems

Fall. 3 credits. Prerequisites: ARCH 261. Corequisite: ARCH 301. R grade only. Staff.

The first semester of this yearlong course addresses the design of the indoor thermal environment, including the appropriate application of building envelope materials and assemblies, and an introduction to the principles of sustainability. Beginning with the basics of human thermal comfort, followed by the concept and practice of solar heating, passive cooling, indoor air quality, and human health, students will learn how to shape the form of a building to respond to climate and the needs of an occupant.

In the second half of the semester, students address the design of mechanical, electrical, and plumbing systems, including heating, ventilation and air-conditioning (HVAC) equipment, vertical transportation, communication, security, and fire protection systems.

ARCH 362(3602) Environmental Systems III—Building Systems Integration

Spring. 3 credits. Prerequisites: ARCH 262, 263, 301 and 361. Corequisite: ARCH 302. Letter grades only. Staff.

The second half of this yearlong course addresses the design of the visual and acoustical environments of buildings. Beginning with the basics of vision, followed by the concept and practice of daylighting, electric lighting sources, and human health, this course will provide students with a working understanding of light and sound as architectural media.

The objective of this yearlong course is to engage students to produce a comprehensive architectural project based on a building program and site. To do this, students will be required to select a design from a prior design studio project to develop in this course. In the comprehensive design project, students will be required to demonstrate an understanding of structural systems,

environmental systems, building envelope systems, life-safety provisions, wall sections, building assemblies and the basic principles of sustainability.

ARCH 461(4601) Ecological Literacy and Design (also DEA 422[4220])

Spring. 3 credits. Letter grades only. Cost of field trips: approx. \$25. J. Elliott.
Lecture/seminar course for advanced (junior or senior) students interested in learning about the effects of designing the built environment of the biophysical world. Course objectives are to develop sensitivities to environmental issues, construct conceptual frameworks for analysis, and demonstrate how ecological knowledge can be applied to the practice of design through participatory approaches to learning. Visit <http://instruct1.cit.cornell.edu/courses/dea422/ARCH>.

ARCH 464(4619) Special Topics in Environmental Systems and Conservation

Fall or spring. 3 credits. Limited to 30 students. Prerequisites: ARCH 261, 361, and 362 or permission of instructor. Not offered every year. Staff.
Topics TBA.

ARCH 474(4618) Special Investigations in Environmental Systems and Conservation

Fall or spring. Variable credit; max. 3. Prerequisite: permission of instructor and approved independent study form. Staff.
Independent study.

ARCH 661(6601) Environmental Systems II—Thermal Environmental Systems

Fall. 3 credits. Prerequisite: second-year M. Arch. I students or permission of instructor. R grade only. Staff.
For description, see ARCH 361.

ARCH 662(6602) Environmental Systems III—Building Systems Integration

Spring. 3 credits. Prerequisite: second-year M. Arch. I students or permission of instructor.
For description, see ARCH 362.

Computer Applications

ARCH 374(3704) Computer Graphics I (also CS 465[4620])

Fall. 4 credits. Prerequisite: CS/ENGRD 211. Staff.
For description, see CS 465.

ARCH 476(4706) Special Topics in Computer Applications

Fall or spring. 3 credits. Limited to 30 students. Prerequisite: ARCH 374 or 379 or permission of instructor. Not offered every year. Staff.
Topics TBA.

ARCH 477-478(4707-4708) Special Projects in Computer Graphics

Not offered every year.

ARCH 479(4709) Advanced Computer Graphics: Virtual Reality (also ARCH 679[6709])

Fall. 3 credits. Prerequisites: introductory computer graphics or computer science course, or permission of instructor; upper-level undergraduate or graduate standing. Not offered every year. H. Richardson.

Explores the role of synthetic imaging and computer graphics in architectural design. The first half of the course examines the new possibilities that information technologies offer for multimedia visualization of architecture, from abstract conceptual drawings, to sketching, photorealistic rendering, and multimodal representation, including motion and sound. The second half explores the uses of information technologies to model and simulate the creative design process. These explorations include developing a library of design ideas as building blocks for design; creating multimodal, multidimensional, immersive, virtual environments; interactive transformation and synthesis of design concepts; and "reverse architecturing" of canonical works. The emphasis of this course is on concepts as well as methods and techniques of computer graphics and their application to simulating the creative design process in architecture.

Graduate Courses

ARCH 679(6709) Advanced Computer Graphics: Virtual Reality (also ARCH 479[4701])

Fall. 3 credits. Prerequisite: introductory computer graphics or computer science course or permission of instructor; upper-level undergraduate or graduate standing. H. Richardson.
For description, see ARCH 479.

ARCH 761-762(7701-7702) Architectural Science Laboratory

761, fall; 762, spring. 6 credits each semester. Prerequisite: architectural science graduate students. D. Greenberg. Projects, exercises, and research in the architectural sciences.

ARCH 763-764(7903-7904) Thesis or Research in Architectural Science

763, fall; 764, spring. Variable credit; max. 12. Prerequisite: architectural science graduate students. Staff.

Independent study.

Architectural History

The history of the built domain is an integral part of all aspects of the architecture curriculum, from design and theory to science and technology. Incoming students take ARCH 181-182 in the first year, and three additional courses from the 380-399 series, preferably in the third and fourth years. Seminars are intended for advanced undergraduate and graduate students and do not satisfy undergraduate history requirements. Courses with the same number may be taken only once to satisfy history of architecture or in-college requirements.

Sequence Courses

ARCH 181(1801) History of Architecture I

Fall. 3 credits. Requirement for first-year architecture students; open to all students in other colleges interested in the history of the built domain. Staff.

The history of the built environment as social and cultural expression from the earliest to more recent times. Themes, theories, and ideas in architecture and urban design are explored, beginning with the earliest written records.

ARCH 182(1802) History of Architecture II

Spring. 3 credits. Requirement for first-year architecture students; open to all students in other colleges interested in the history of the built domain; may be taken independently of ARCH 181. Staff.

The history of the built environment as social and cultural expression from more recent times to the present. Architecture and urban design themes, theories, and ideas are addressed in greater detail leading to the present time.

Directed Electives**ARCH 380(3800) History of Theory**

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. Staff.

This course, in which classroom discussion and debate play a central role, explores the history of important theoretical issues involving art and architecture. The readings, which span from the Greeks to today, focus on more than just questions of aesthetics and include theories of ethics, origins, imagination, nature, society, and pedagogy.

ARCH 381(3801) From Utopia to the Ghetto: Renaissance Urban Form

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. M. Lasansky.

Significant developments in European urban design from 1300 to 1600. Particular attention is given Italy and Spain. Focuses on a series of case studies: entire towns, specific urban spaces, and individual building types. Weekly discussions contextualize the city within a larger cultural framework. This course considers how civic, economic, social, political, legislative, technical, and material concerns have had a significant impact on the form, function, and patronage of these places, spaces, and structures. The relevance of Renaissance theory to contemporary practice is also emphasized through the discussion of several 20th-century urban plans and built projects.

ARCH 382(3802) The Cinematic City

Fall. 3 credits. Prerequisite: ARCH 181-182 or permission of instructor. Not offered every year. M. Lasansky.

Examines the relationship between cinematic forms of mass media and architecture. Explores the representation, perception, and understanding of architecture as it has been mediated by various cinematic genres including film, television, and documentaries. Considers how cinema has been deployed as a tool in architectural production, how it has influenced the experience and design of space, the extent to which it has been used as a vehicle for critical commentary on the urban condition, and the way it is imbedded in the historical development of architecture and urbanism.

ARCH 383(3803) The Construction of Modern Life: The Politics of Memory and the Commodification of Architecture

Fall or spring. 3 credits. Prerequisite: ARCH 181-182 or permission of instructor. Not offered every year. M. Lasansky.

Examines the complex relationship between the built environment, the construction and definition of cultural heritage, collective memory and civic identity, and the commodification or commercial celebration of

specific buildings, sites, and urban events. Focuses on late 18th-, 19th-, and 20th-century Europe. Particular attention is awarded to the discourse surrounding the restoration of buildings (and figures such as Ruskin, Viollet-le-Duc, and Giovannoni); political agendas guiding restoration and urban renewal projects; newly defined venues of modern urban spectacle (e.g., the World's Fair, department stores, morgues, and panoramas); and the role played by tourism in the commodification of local and foreign sites.

ARCH 384(3804) The Urban Landscape of Renaissance Rome: 1450 to 1600

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. M. Lasansky.

Exploration into the urban morphology, architecture, and civic life of Renaissance Rome. The city was a thriving center for architectural practice. It drew practitioners from throughout the peninsula and served as an important theoretical model for architects elsewhere. The course surveys the important issues, individuals, and building projects of the city between 1450 and 1600 with particular emphasis on the intellectual and physical rediscovery and re-appropriation of Antiquity; the role of the Vatican with its large population of pilgrims, tourists, resident church officials, foreign bankers, and dignitaries that made specific demands of the built environment; and the unique topography and natural resources of the city's location. The last portion of the course addresses the legacy of the Renaissance during the period of Italian unification and the Fascist regime.

ARCH 385(3805) Magnificent Utility—Architecture and the Arts of Persuasion

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. C. Otto.

Architects put revolutionary attitudes about form, space, light, and the arts into practice during the course of the 17th century. Focusing on the urban centers of Rome and Paris and the cultural landscapes of Spain, England, and Central Europe, this course explores how architecture, urban design, and the arts were employed to promote state and church.

ARCH 386(3806) The Architecture of India and Its Interpretation

Spring. 3 credits. Not offered every year. B. MacDougall.

Surveys the architectural record of ancient and medieval India with an emphasis on stupa and temple traditions. Devotes attention to European efforts to write a Western-style architectural history for India and to the British fascination with explaining Indian ethnology and history over two centuries. Attempts to evaluate the claim made by the historian James Fergusson that architecture provided the basis for reconstructing an imperfectly known Indian history. Also examines the notion that scholarly enterprises were closely entwined with strategies for domination. To this end, students read 19th-century firsthand reports on architecture in antiquarian English-language journals alongside more modern accounts. They are compared with indigenous architecture writings that were often unacknowledged by Europeans.

ARCH 387(3807) 19th Century: Tales of the City

Fall or spring. 3 credits. Prerequisite: ARCH 181-182 or permission of instructor. Not offered every year. M. Woods.

Focuses on 19th-century cities as settings for modernisms and modernities, new visions and experiences of modern life. The relationship between urbanism and creativity that emerges during the 19th century engages students in Berlin, Havana, Miami, London, Bombay, Paris, Harlem, and other cities. Issues of center and periphery, nation and locality, capital and colony also emerge. Urban pleasures and dangers for men, women, and the other as revealed through histories of the built environment but also through literature, painting, photography, and film are examined.

ARCH 388(3808) Modernism

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. C. Otto.

Precursors and proponents of the modern movement from the late 19th century into the 1940s are considered in this course. The cultural intents of the modern are examined in architectural and urban design for individuals, groups, and institutions, from Mies van der Rohe, Le Corbusier, and Frank Lloyd Wright to de Stijl, the Bauhaus, and design education. Attention is paid to the politics of design serving the state in the 1930s.

ARCH 389(3809) Architecture, Revolution, and Tradition

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. C. Otto.

From early 18th to early 19th century, European society underwent profound change. Political absolutism—the doctrine of unlimited governmental control—was challenged; enlightenment attitudes—commitments to human reason, science, and education—gained ascendancy. This course considers architectural and urban design in these times of tumult. It begins with efforts to foment architectural revolution within inherited traditions and ends with attempts to establish design traditions within revolutionary settings.

ARCH 390(3810) American Architecture and Building I (also AM ST 390(3810))

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. M. Woods.

Review of architecture, building, and responses to the landscape from the prehistoric period to the Civil War. Architecture and building as social and collaborative arts are emphasized and thus the contributions of artisans, clients, and users as well as professional architects and builders are examined. The architectural expressions of Native Americans, African Americans, women, and others are treated in addition to those of European colonists and settlers.

ARCH 391(3811) American Architecture and Building II (also AM ST 391(3811))

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. M. Woods.

Continuation of ARCH 390 but may be taken independently. An account of American

architecture, building, and responses to the environment from the post-Civil War period to the present day. Particular attention is paid to the processes of industrialization, professionalization, and urbanization as well as to the manifestations of gender, class, race, and ethnicity in the built and architectural environments.

ARCH 392(3812) Modern Architecture on Film

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. M. Woods.

Exploration of certain themes deemed critical to modern architecture and urbanism through their representation in both commercial and avant-garde films from the medium's birth until the present day. The focus varies each semester with particular emphases to include the modern house and housing, the modern city, technology and visions of the future, and finally the image of the architect. Representations of these themes in other forms such as painting, photography, theater, literature, and advertising also are examined. The course includes selected readings in modern architecture and film, screenings in class, class discussions, presentations, and papers.

[ARCH 393(3813) The Cumulative City]

ARCH 394(3904) Toward the Millennium

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. C. Otto.

Theory and practice in architecture and urbanism are investigated from the 1950s to the present. From the Americanized International Style to the more recent internationalism of design attitudes, the immediate past is explored historically to probe the matrix of meanings associated with contemporary form, urbanism, and technology.

ARCH 395(3815) History of the Present—Contemporary Architecture and Urbanism

Fall or spring. 3 credits. Prerequisite: ARCH 181-182 or permission of instructor. C. F. Otto.

Theory and practice in architecture and urbanism are investigated from later Modernism to contemporary positions. Built work, theoretical texts and graphics, and the nature of design practice in locations worldwide (such as the United States and the Pacific Rim) raise issues of globalization and the specificity of place and cultural identity. By engaging the immediate past using methods of cultural and design history, the course problematizes the relationship (and relevance) of history to architectural practice and experience.

ARCH 396(3816) Special Topics in the History of Architecture and Urbanism

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. Staff.

Topics TBA.

ARCH 397(3817) Special Topics in the History of Architecture and Urbanism

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. Staff.

Topics TBA.

ARCH 398(3818) Special Topics in the History of Architecture and Urbanism

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. Staff.

Topics TBA.

ARCH 399(3819) Special Topics in the History of Architecture and Urbanism

Fall or spring. 3 credits. Prerequisites: ARCH 181-182 or permission of instructor. Not offered every year. Staff.

Topics TBA.

Graduate Seminars in the History of Architecture and Urbanism

All topics for ARCH 682 to 699 TBA before the start of the semester.

ARCH 680(6800) Seminar in Historiography

Fall. 4 credits. Requirement for first- and second-year graduate students in History of Architecture and Urbanism Program. Prerequisite: permission of instructor. Staff.

Examines historiographic and methodological issues in relation to the history of architecture and urbanism. Taught by different faculty members in successive years, the seminar is required of all first- and second-year graduate students in the History of Architecture and Urbanism Program.

ARCH 682(6802) Seminar in Urban History

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

ARCH 683(6803) Seminar in History of Theory

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

ARCH 684(6804) Seminar in Italian Renaissance: Architecture, Politics, and Urbanism

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. M. Lasansky.

[ARCH 686(6806) Seminar in 17th- and 18th-Century Architecture and Urbanism]

[ARCH 688(6808) Seminar in 20th-Century Architecture and Urbanism]

ARCH 689(6809) Seminar in History of Cities

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

[ARCH 690(6810) Seminar in American Architecture, Building, and Urbanism]

[ARCH 692(6812) Seminar in 19th-Century Architecture, Building, and Urbanism]

ARCH 696(6816) Seminar in Special Topics in the History of Architecture and Urbanism

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

ARCH 697(6817) Seminar in Special Topics in the History of Architecture and Urbanism

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

ARCH 698(6818) Seminar in Special Topics in the History of Architecture and Urbanism

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

ARCH 699(6819) Seminar in Special Topics in the History of Architecture and Urbanism

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered every year. Staff.

Independent Study, Thesis, Dissertation

ARCH 299(2809) Undergraduate Independent Study in the History of Architecture and Urbanism

Fall or spring. Variable credit; max. 3. May not be taken by students in design to satisfy undergraduate history requirements. Prerequisite: permission of instructor. Staff.

Independent study for undergraduate students.

ARCH 499(4901) Undergraduate Thesis in the History of Architecture and Urbanism

Fall or spring. 4 credits. Prerequisite: B.S. honors candidates in history. Staff.

ARCH 799(7809) Graduate Independent Study in the History of Architecture and Urbanism

Fall or spring. Variable credit; max. 12. Prerequisite: permission of instructor. Staff.

Independent study for graduate students only.

ARCH 899(8921) M.A. Essay in the History of Architecture and Urbanism

Fall or spring. 4 credits. Staff. Independent preparation of the M.A. essay, often developed from topics investigated in ARCH 680.

ARCH 999(9901) Ph.D. Dissertation in the History of Architecture and Urbanism

Fall or spring. Variable credit; max. 12. Staff.

Independent study for the doctoral degree.

ART

TBA, chair (224 Tjaden Hall, 255-3558); M. Ashkin, R. Bertoia, J. Locey, T. McGrain, director of graduate studies; E. Meyer, G. Page, M. Park, B. Perlus, B. Spector, W. S. Taft, and visiting artists and critics.

Undergraduate Program

The curriculum in art is a program of study within the College of Architecture, Art and Planning, as well as other colleges at Cornell.

The undergraduate curriculum in art is an excellent background for a career in the visual arts. Past graduates have found it also to be preparation for careers in applied art, although no specific technical courses are

offered in such areas as interior design, fashion, or commercial art.

The undergraduate curriculum in art, leading to the degree of bachelor of fine arts, provides an opportunity for the student to combine a general liberal education with the studio concentration required for a professional degree. During the first four semesters, all students follow a common course of study designed to provide a broad introduction to the arts and a basis for the intensive studio experience of the last two years. Beginning with the third year, students concentrate in electronic imaging, painting, photography, printmaking, sculpture, or combined media.

Studio courses occupy approximately one-half of the student's time during the four years at Cornell; the remaining time is devoted to a diversified program of academic subjects with a generous provision for electives.

All members of the faculty in the Department of Art are practicing, exhibiting artists, whose work represents a broad range of expression.

A candidate for the B.F.A. degree may also earn a bachelor of arts degree from the College of Arts and Sciences or the College of Human Ecology, or a bachelor of science degree from the College of Engineering, in a five-year dual degree program. This decision should be made early in the candidate's career (no later than the third semester) so that he or she can apply to be registered in both colleges simultaneously. Each student is assigned an advisor in both colleges of their dual-degree program to provide needed guidance. Candidates for two degrees must satisfy all requirements for both degrees. At least 62 of the total credits must come from courses offered in the Department of Art. In addition, all Department of Art requirements for first-year writing seminars, art history, and distribution must be met.

It is expected that a dual-degree candidate will complete the pre-thesis and thesis requirements for the B.F.A. degree during the fourth and fifth year.

Bachelor of Fine Arts Degree Requirements

Credits and Distribution

The B.F.A. degree requires 130 academic credits. A minimum of 59 are taken in the Department of Art.

Curriculum

Students are expected to take an average course load of 16 credits per semester during their four years. Students wishing to take more than three studio courses in any one semester must file a petition. All students must take at least one studio course a semester unless there are exceptional circumstances expressed in the form of a petition. **Any request to deviate from the standard curriculum must be petitioned to the department before the act. No student in the first year of the B.F.A. program will be permitted to deviate from the required curriculum.**

Specific Course Requirements

By the end of the second year, students must have completed an introductory course in

each of the areas of painting, sculpture, printmaking, photography, electronic imaging, and four drawing courses. By the end of the third year, all students must have completed an additional 12 credits beyond the introductory level in three of the four areas.

Concentration

Students must plan their programs to complete 26–27 credits in one of the studio areas of electronic imaging, painting, photography, printmaking, or sculpture. Declaration of the area of concentration must be made by the second semester of the sophomore year. Students concentrating in combined media must also submit an approved projected course plan. B.F.A. students complete a senior thesis in one area of concentration and are required to participate in the Senior Exhibition in the semester the thesis is taken.

Concentration Requirements (27 credits total; 26 in electronic imaging and printmaking)

The required courses for each concentration are as follows:

Electronic Imaging: ART 171; 271/234 (1 of 2); 272/273 (1 of 2), 373/374 (1 of 2), 471, 472 (senior thesis)

Painting: ART 121, 221, 321, 322, 421, 422 (senior thesis)

Photography: ART 161, 261, 263; 264, 265, 361 (1 of 3); 461, 462 (senior thesis)

Printmaking: ART 131/132/133 (2 of 3); 134, 231, 232, 233, 234 (1 of 4); 331, 431, 432 (senior thesis)

Sculpture: ART 141, 241, 341, 342, 441, 442 (senior thesis)

Dual Concentration

Students interested in studying in more than one area may choose to do a dual concentration. The dual concentration requires a first area, in which the thesis is conducted, and a nonthesis second area. Pre-thesis and thesis must be taken in the first area of concentration. Students take 23 credits in the first area of concentration (22 for printmaking) and 15 credits in the second area of concentration (14 for printmaking). Drawing is available only as a second area of concentration.

The required courses for the dual concentration are:

First Area of Concentration Total Credits

Electronic Imaging: ART 171; 271/234 (1 of 2); 272/273 (1 of 2) or 373/374 (1 of 2); 471/472 23

Painting: ART 121, 221, 321, 421, 422 23

Photography: ART 161, 261, 263/264/265/361 (1 of 4), 461, 462 23

Printmaking: ART 131/132/133 (2 of 3) 231/232/233 (1 of 3) 431, 432 22

Sculpture: ART 141, 241, 341, 441, 442 23

Second Area of Concentration Total Credits

Drawing: ART 151, 152, 251, 252, independent study 15

Electronic Imaging: ART 171; 271/234 (1 of 2); 272/273 (1 of 2); or 373/374 (1 of 2) 15

Painting: ART 121, 221, 321, 322 15

Photography: ART 161, 261, 263/264 265/361 (2 of 4) 15

Printmaking: ART 131/132/133 (2 of 3) 231/232/233 (1 of 3); 331 14

Sculpture: ART 141, 241, 341, 342 15

Note: The total number of out-of-college elective credits required will be adjusted to allow for the additional credits required of the dual concentration.

Combined Media Concentration

The combined media concentration enables students to fulfill concentration requirements by combining several studio disciplines, including out-of-department studio courses such as those offered in the departments of music and theatre, film, and dance.

Students must file an approved "area of concentration" form. In addition to the courses required of all B.F.A. majors during their first and second year (see B.F.A. curriculum), students must take two studios at the 200 or 300 level, a minimum of two "out of college" studio electives (OCE studio) of 3–4 credits each, ART 481 Pre-Thesis in Combined Media and ART 482 Thesis in Combined Media.

Note: The total number of in- and out-of-college elective credits required will be adjusted to allow for additional credits required of the combined media concentration.

Rome Program

Students in good standing who have completed the requirements of the first two years of the curriculum are eligible for participation in the Rome Program. Students are admitted to the program by application and review of their academic record. Applications are submitted to the Rome Program coordinator. Students applying to the Rome Program must meet with their faculty advisor and the department chair to obtain signatures of approval for admission to the program. Students in the department wishing to attend the Rome Program must register for a full semester of credits. The department recommends that students attend the program during the first or second semester of their junior year. (Under special circumstances, seniors may petition to attend the Rome Program.) **Only under special circumstances, and with prior petition and approval, are seniors allowed to attend the Rome program.** Students wishing to spend two consecutive semesters in Rome must submit a petition, which should include the proposed course schedule for both semesters and must have appropriate faculty approval.

Sample Rome Curriculum

ART 400	Rome Studio	4
	Requirement for Rome B.F.A. students, fulfills 4 credits in a studio concentration	
ART 209	Site-Specific Processes	3
ART 312*	Modern Art in Italy	3
ART 317	History of Art in Rome: Early Christian to the Baroque Age [not offered 2007–2008]	4
or		
ART 318	History of Art in Rome: Renaissance in Rome and Florence	4
or		
ART 372.20	Special Topics in Art History (spring only)	4
or		
ART 372.22	Special Topics: Intermediate and Advanced Drawing	3
ITALA 111/112	Italian Language	4
[ARCH 317	Contemporary Italian Film 1**]	

**Students may add by approved petition to take 19 credits in Rome.

17–18 Total

Other electives available to B.F.A. students include courses in architectural history, visual studies, city and regional planning, and the Independent Studio in Art.

Students may petition to take more than 16 credits per semester in the Rome Program. Students may study in Rome for one or two academic semesters.

*Fulfills 300-level theory and criticism requirement.

Out-of-College Requirements

A minimum of 61 elective credits must be taken outside of the college. In the first year, students must take two first-year writing seminars. Students are required to take courses from among three groups, which include: physical and biological sciences (minimum of two courses, of at least 3 credits each); social sciences (minimum of three courses, of at least 3 credits each); and humanities and expressive arts (minimum of three courses, of at least 3 credits each). All B.F.A. students are required to take 20 credits in the history of art. One course must be taken in each of the following areas:

Modern: for example, 260, 265, 270, 360, 362, 365, 366, 367, 370, 376, 447, 464.

Non-Western: for example, 215, 280, 339, 378, 380, 383, 384, 385, 386, 395, 396, 470, 478, 490, 571.

Three electives: any art history elective at the 300 level or above or any architectural history elective. (Note: Offerings may vary each semester. Students are encouraged to consult with their advisor. Students may petition to substitute courses of similar content.)

The university requirement of two semesters in physical education must be met.

A candidate for the B.F.A. degree at Cornell is required to spend the last two semesters of candidacy in residence at the university, subject to the conditions of the Cornell faculty legislation of November 14, 1962. No student may study in absentia for more than two semesters.

Students who transfer into the undergraduate degree program in art must complete a minimum of four semesters in residence at Cornell and a minimum of 60 credits at the university, of which 30 credits must be taken in the Department of Art, including four semesters of studio work.

For those students matriculating in fall of 2007:

Students are required to take AAP 111 The World We Make; ART 111 Introductory Art Seminar; ART 121 Introductory Painting; Art 151 Drawing I; ART 141 Introductory Sculpture; Art History elective; and a first-year writing seminar during the fall semester of the freshman year. ART 131/132/133 Introductory Printmaking; Art 152 Drawing II; Art History elective; and an additional first-year writing seminar must be taken during the spring semester of the freshman year. Two 300-level courses in theory and criticism must be taken sometime between the sophomore and senior years.

Courses that will fulfill the theory and criticism requirement (Note: Offerings may vary from year to year. Check the current course catalog.):

The M.F.A. Program

The master of fine arts program requires four semesters of full-time study, equal to a minimum of 60 credits. Graduate work done elsewhere or in the summer session is not applicable to the M.F.A. degree. The curriculum leading to the master's degree is flexible to accommodate the needs of the individual student and to enable the student to partake of the greater Cornell community. The ratio of graduate faculty to students allows an exceptional opportunity for individual mentoring. Graduate students are provided individual studios and have 24-hour access to studios and labs.

Graduate students in art may enroll in introductory or advanced courses in any field of study offered at the university. Fifteen credits are required in each semester; of these, 9 credits are in studio work, and 3 credits are in graduate seminar (ART 611, 612, 623, 624). Students are required to take at least 12 credits of academic work outside the Department of Art during their four semesters in residence. Candidates for the master of fine arts degree must have completed 18 credits in the history of art in the course of their graduate and/or undergraduate study. Undergraduate course work to be applied toward this requirement will be evaluated by the director of graduate studies. Every M.F.A. candidate must prepare a written statement, offer a thesis exhibition of studio work completed during residency, and give an oral defense of the written statement and visual thesis. Gallery space is provided for a one-week solo thesis exhibition during the final spring semester.

Course Information

Most courses in the Department of Art are open to students in any college of the university who have fulfilled the prerequisites or have permission of the instructor.

Fees are charged for all studio courses. See the specific course description for course fees.

To take advantage of the special opportunities afforded by summer study, several courses are offered during summer session.

Guidelines for Independent Study

A student who wishes to undertake an independent study must be a junior and in good academic standing. Fine arts students must have completed two years of the curriculum, **including all first- and second-year studios and four semesters of drawing**. Students must have prior approval to have an independent study count as a drawing requirement. All students must have taken a minimum of one Cornell art department course in the area of the proposed independent study. It is recommended that the student take the independent study with a professor with whom they have previously studied. Out-of-department students may be exempt from the studio sequence requirement at the discretion of the supervising professor. Independent studies must be petitioned to count toward required studio courses. Credit hours are variable up to a maximum of 4.

Courses in Theory and Criticism

AAP 111(1101) The World We Make

Fall and spring. 1 credit. S-U grades. Staff. For description, see p. 126.

ART 111(1101) Introductory Art Seminar

Fall. 1 credit. Prerequisite: B.F.A. students. S-U grades only. Staff.

Students meet each week with a different member of the faculty. The varying artistic interests of the faculty are presented and discussed. A maximum of two absences are allowed except by permission of chairman.

ART 170(1700) Visual Imaging in the Electronic Age

Fall or spring. 3 credits. D. Greenberg. Interdisciplinary survey course designed to introduce students in the creative arts, science, and engineering to the concepts of digital pictorial representation and display. It is a concept and theory course that concentrates on "why" rather than "how." Topics include perspective representations, display technology, how television works, bandwidth concepts, digital photography, computer graphics modeling and rendering, matting and compositing, color perception, data acquisition, volumetric imaging, and historical precedents, primarily from the art world. Also included are other modes of imaging.

Related Courses

[ART 209(2009) Site-Specific Processes]

ART 214(2104) Art and the Multicultural Experience

Fall. 3 credits. R. Dalton. Investigates selected topics related to art and the multicultural experience. Students study the basic vocabulary and tools used in the expression of art. Students question the nature of the visual arts as a discipline and survey art created by underrepresented American minority cultural groups.

ART 311(3101) Issues in Contemporary Art

Fall or spring. Lab fee: \$35. Staff. Students will be exposed to the ideas, issues, and methods of contemporary visual art by combining studio practice with discussions of critical and theoretical concerns in visual culture. The course combines lectures, readings, discussions, project work, and critiques. Students will make art by using a variety of mediums, with projects structured in relation to issues and artists covered in the lecture component. Discussions of historical movements and artists since the 1980s will be stressed. Studio assignments are designed to familiarize students with a number of ways of making art and in encouraging the understanding of the connections between the conceptual and the technical in art making.

ART 312(3102) Modern Art in Italy

Fall or spring. 3 credits. Fulfills 300-level theory and criticism requirement for fine arts majors. Prerequisite: Rome Program participants. Staff. Introduces students to contemporary art in Rome through studio visits, gallery exhibitions, and museum collections. Lectures by artists, critics, and others. Traces art from idea to realization and explores the gallery and its relationship to artists and to

promotion of art, the role of the art critic and museum, and art collecting.

ART 317(3107) History of Art in Rome: Early Christian to the Baroque Age

4 credits. Rome Program. Not offered every year. Staff. General survey of the early Christian period to the fantastic vision of Piranesi in the 18th century. Special emphasis will be placed on the developments of the Renaissance and Baroque periods. Weekly lecture and field trips.

ART 318(3108) History of Art in Rome: Renaissance in Rome and Florence

Not offered every year. Staff. Surveys art from the beginning of the 15th century to Michelangelo's death (1564) with field trips to important churches, collections, and villas. Emphasis is given to sculpture and painting, and in the case of fresco, mosaics, and stucco decoration, the relationship with architecture and environment is a key element.

ART 419(4109) Independent Study/ Supervised Readings in Art

Fall, spring, or summer. 4 credits, variable. Prerequisite: juniors in good academic standing and written permission of instructor. Staff.

Independent reading and research allows a student the opportunity to investigate special interests that are not treated in regularly scheduled courses. The student develops a plan of study to pursue under the supervision of a faculty member.

Graduate Studio and Theory Courses

ART 570(5700) Theory Seminar

Fall and spring. 4 credits. Priority given to AAP and History of Art graduate students. Staff.

Introduces students in art, art history, and architecture to diverse theoretical texts of relevance to the three fields. Readings include classic texts in post-structural theory and more recent writings in new areas of theory and artistic practice, including digital art, cyber-feminism, globalization, museums and museology, architecture in/as visual space, biotechnology and artificial life, as well as issues in cognitive science and human-computer interaction centering on space and embodiment. Occasionally this seminar focuses on a single topic of convergence for these diverse areas.

ART 611(6101) Professional Skills for the Visual Artist

Spring. 3 credits. Prerequisite: M.F.A. students. Staff. This seminar helps fine arts graduate students build professional skills that will assist them in their careers as practicing artists and in their work at art-related employment. Students complete a resource notebook that will be useful to them in the years after they graduate. Topics include: funding resources, exhibition opportunities, employment options, documentation of work, health, safety, and legal issues.

ART 612(6102) Recent Practice in the Visual Arts

Fall. 3 credits. Prerequisite: M.F.A. students. Staff. This seminar is designed to provide graduate students with an overview of recent visual artwork. Students study work from a wide range of artists who have received significant recognition within the visual arts community.

Reviews of major exhibitions such as "Documenta," "La Biennale di Venezia," and the "Whitney Biennial" are discussed. Students are encouraged to travel to nearby cities to look at contemporary work.

ART 613(6103) Online Publication for the Visual Artist

Fall. 3 credits. Prerequisite: M.F.A. students. Staff.

Seminar designed to introduce graduate students to the basic principles of electronic imaging. As a major project, each student interviews a contemporary visual artist. These interviews are illustrated with digital images of each artist's work and combined in an online magazine. Additionally each student learns to create a home page on the web.

ART 614(6104) Contemporary Theory in the Visual Arts

Spring. 3 credits. Prerequisite: M.F.A. students. Staff.

Seminar exploring selected writings on the current issues represented within the visual arts. Designed to introduce graduate students to several approaches to critical inquiry and analysis of contemporary visual practice. Topics vary but may include related criticism in areas such as visual culture, semiotics, identity politics, and institutional frames.

ART 623(6203) Contemporary Theory and Visual Culture

Fall. 3 credits. Prerequisite: M.F.A. students. Staff.

Seminar exploring selected writings on current issues in the visual arts. Designed to introduce graduate students to several approaches to critical inquiry and analysis of contemporary practice in the visual arts. Topics vary but may include related criticism in areas such as visual culture, semiotics, identity politics, and institutional frames.

ART 624(6204) Current Criticism in the Visual Arts

Spring. 3 credits. Prerequisite: M.F.A. students. Staff.

Seminar designed to introduce graduate students to critical writing in the visual arts, both in print and in digital format. As a major project, each student interviews a contemporary visual artist. These interviews are illustrated with digital images of each artist's work and combined in an online magazine. Additionally, each student learns to create a home page on the web.

Graduate Studio Courses

ART 701-702(7010-7020) Graduate Studio I and II

701, fall; 702, spring. 9 credits.

Prerequisite: first-year MFA students. Staff.

Required for all MFA students. Course instructor is the chair of student's Special Committee. Students are responsible, under faculty direction, for planning their own projects and selecting the media in which they work. All members of the faculty are available for individual consultation.

ART 801-802(8010-8020) Graduate Studio III and IV

801, fall; 802, spring. Second-year MFA students. 9 credits. Staff.

Required for all MFA students. Course instructor is the chair of student's Special Committee. Students are responsible, under faculty direction, for planning their own projects and selecting the media in which

they work. All members of the faculty are available for individual consultation.

Undergraduate Studio Courses in Drawing

Fees for all drawing courses: \$25

ART 151(1501) Drawing I

Fall, spring. 3 credits. Staff.

General course introducing students to principles and techniques of representation. Emphasis is on creating the illusion of space and form through line, the rendering of light and shade, and studies in perspective. Students have the opportunity to explore various media such as charcoal, chalk, pencil, pen, ink, and wash.

ART 152(1502) Drawing II

Spring. 3 credits. Prerequisite: ART 151. Staff.

General course in drawing that emphasizes figure study and life drawing. Builds on the foundation of ART 151 and concentrates on the analytical study of the figure. Students explore a variety of materials, traditional and contemporary.

ART 158(1508) Conceptual Drawing

Summer, six-week session. 3 credits. Staff.

Emphasizes drawing from the imagination. Stresses the generation of ideas and their development in sketches. The intent is not to produce finished art but rather to experience a series of problems that require image and design concepts different from those of the artist working directly from nature.

ART 159(1509) Life and Still-Life Drawing

Summer, six-week session. 3 credits. Staff.

Studies the human figure and still life both as isolated phenomena and in relation to their environment. Focuses on helping the student observe and discover.

ART 251(2501) Drawing III

Fall. 3 credits. Prerequisite: ART 152. Staff.

Intermediate drawing course in which students study composition, the articulation of form, and the illusion of space in a variety of materials. Expressive content, conceptualization, and the exploration of materials are stressed.

ART 252(2502) Advanced Drawing Workshop

Fall or spring. 3 credits. Prerequisite: ART 251. Corequisite: BFA pre-thesis studio. Staff.

This advanced studio workshop focuses on the use of drawing for the development and refinement of complex visual expression. Using both traditional and nontraditional drawing approaches, students work to clarify their conceptual concerns and develop a pertinent visual vocabulary. This course begins with assignments structured to identify the conceptual and formal considerations central to each student's individual artistic intentions. Once identified, these artistic intentions become the basis for a rigorous investigation. The resulting body of work informs and supports advanced thesis work across the visual art and design disciplines. This course includes faculty and student presentations on historical and contemporary art, as well as regular critiques focusing on peer evaluation.

ART 459(4509) Independent Studio in Drawing

Fall, spring, or summer. 4 credits, variable.

Prerequisites: juniors in good academic standing and written permission of instructor. Staff.

Independent studio in drawing that allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide his or her progress and evaluate the results.

Undergraduate Studio Courses in Electronic Imaging

Course fees:

171, 372, 479	\$250
234, 271, 272	\$105
373/374	\$250
471, 472	\$ 70

ART 171(1701) Electronic Imaging in Art

Fall or spring. 3 credits. Staff.

Introductory studio course using the computer as a tool for making art. Students explore various approaches to 2- and 3-D web art using software programs and various functions. This course is an introduction to the web.

ART 234(2304) Large-Format Digital Printing

Fall and spring. 4 credits. Prerequisite: ART 171. Staff.

Focuses on the use of digital printing and its use in combination with traditional forms of printmaking. Students explore various approaches to image making while also using traditional materials and media, including relief, monotype, lithography, screen printing, intaglio, transfers, collage, and photomechanical processes. Students use appropriate software, including Adobe PhotoShop, QuarkXpress, Final Cut Pro, and Adobe Illustrator to draw from both still and video-based sources. Students work with large-format inkjet printers.

ART 271(2701) Electronic 3-D Modeling and Animation

Fall or spring. 4 credits. Prerequisite: ART 171. Not offered every year. Staff.

Studio course in creating 2- and 3-D still and animated visualizations using computers and 3-D software for object modeling, animation, and rendering. This course concentrates on the web.

ART 272(2702) Digital Video and Sound

Fall or spring. 4 credits. Prerequisite: ART 171. Not offered every year. Staff.

Studio course that introduces students to digital video including capture stills, animation, video, and sound with an introduction to interactive presentation and CD-ROM production. This course concentrates on the web.

ART 273(2703) Computer Animation (also CIS 565[5640])

Fall. 4 credits. D. Greenberg.

Focuses on techniques of computer animations. Combines critical readings with studio projects that employ a variety of animation software. Topics include modeling, storyboarding, 2-D and 3-D key frame animation, motion and kinematics, lighting effect and shading, texturing and material

properties, physical simulation, and cinematography.

ART 373(3703) Advanced Projects in Time-Based Art

Fall. 4 credits. Prerequisites: ART 170 and one of the following: ART 272, 273, 234 or permission of instructor. Letter grades only. Staff.

This course teaches advanced techniques for creating nonlinear moving images with digital sound. Projects include integrating key frame-based animation, layering animated text, still, and video images made with 3D software applications, field recording, and sound mixing. Emphasis will be placed on ways of integrating and manipulating time-based images and sound to make multimedia art projects and installations for public spaces.

ART 374(3704) Interactive Digital Media

Spring. 4 credits. Prerequisites: ART 171 and one of the following: ART 272, 273, 234 or permission of instructor. Letter grades only. Staff.

This is a project-centered studio course designed to encourage students to integrate computer-aided and time-based media (video, sound, motion graphics, and text) using physical materials and space. The course will challenge students to develop a theoretical understanding of the relationship between body and technology in a social and cultural context. Students will use digital technologies to create projects using interactive CD-ROM/web art, sensor and micro-controller aided interactive video and sound installations, real-time performance, and public space. The course encourages integrative approaches to studio production.

ART 471(4701) Pre-Thesis in Electronic Imaging

Fall and spring. 6 credits. Prerequisites: ART 171, 234 or 271, 272 or 273, 373 or 374. Staff.

For information, please call department.

ART 472(4702) Thesis in Electronic Imaging

Fall and spring. 6 credits. Prerequisite: ART 471. Staff.

For information, please call department.

Undergraduate Studio Courses in Painting

Fees for painting courses (121, 221, 321, 322, 421, 422, 429): \$40

ART 121(1201) Introductory Painting

Fall, spring, or summer. 3 credits. Staff. Studies the language of painting through color, form, materials, and techniques. Aspects of traditional and modern pictorial composition are studied including proportion, space, and color theory through the representation of a variety of subjects.

ART 221(2201) Painting II

Fall or spring. 4 credits. Prerequisite: ART 121 or permission of instructor. Staff. Continuation of the study of aspects of pictorial composition initiated in ART 121, focusing on problems relating to the depiction of the figure, space, and light. Topics are explored within the context of historical and contemporary artistic expression.

ART 321(3201) Painting III

Fall or spring. 4 credits. Prerequisite: ART 221 or permission of instructor. Staff.

Intensive study of painting materials and techniques to express pictorial ideas. A variety of traditional painting techniques are explored including egg tempera, fresco, gouache, encaustic, and oil. In addition, paints and associated techniques developed in the 20th century are used as well as developing technologies applicable to the painting process.

ART 322(3202) Painting IV

Fall or spring. 4 credits. Prerequisite: ART 321 or permission of instructor. Staff.

Advanced course centered on issues of artistic expression. A variety of painting media are used to address conceptual issues through representation as well as abstraction.

ART 421(4201) Pre-Thesis in Painting

Fall or spring. 6 credits. Prerequisite: ART 322. Staff.

Advanced study of painting through assigned and independent projects using a variety of materials leading to the formulation of a thesis project.

ART 422(4202) Thesis in Painting

Fall or spring. 6 credits. Prerequisite: ART 421. Staff.

Focused independent project demonstrating creative ability and technical proficiency. Projects are exhibited in an appropriate space at the end of the semester.

ART 429(4209) Independent Studio in Painting

Fall, spring, or summer. 4 credits, variable. Prerequisites: juniors in good academic standing and permission of instructor. Staff.

Independent studio in painting that allows students the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide his or her progress and evaluate results.

Undergraduate Studio Courses in Photography

Darkroom fees for photography courses:

Black-and-white courses: \$135

Color courses: \$215

Additional black-and-white course taken the same semester: \$55

Additional color course taken the same semester: \$135

ART 161(1601) Photography I

Fall, spring, or summer. 3 credits. Staff. Basic lecture-studio course in black-and-white photography for beginners. Emphasis is on basic camera skills, darkroom techniques, and understanding of photographic imagery.

ART 168(1608) Black-and-White Photography

Summer, three-week session only. 3 credits. Staff.

Intended for students at all levels, from introductory to advanced. Emphasis is on camera skills, darkroom techniques, and the content of black-and-white photographic imagery.

ART 169(1609) Color Photography

Summer, three-week session only. 3 credits. Staff.

Intended for students at all levels, from introductory to advanced. Emphasis is on camera skills, darkroom techniques, and the content of color photographic imagery.

ART 261(2601) Photography II

Fall, spring, or summer. 4 credits. Prerequisite: ART 161 or ARCH 251, or permission of instructor. Staff.

Continuation of Photography I, concentrating on black-and-white photographic processes, history and theory of creative practice, and individual projects.

ART 263(2603) Color Photography

Fall and summer. 4 credits. Prerequisite: ART 161 or ARCH 251, or permission of instructor. Staff.

Studio course in color photography with emphasis on camera skills, darkroom techniques, and the content of color photography.

ART 264(2604) Photo Processes

Fall, spring, or summer. 4 credits. Prerequisite: ART 161 or ARCH 251, or permission of instructor. Staff.

Studio course in alternative and nonsilver photographic processes. Emphasis is on camera skills, basic techniques and processes, image content, and creative use of photo processes.

ART 265(2605) Studio Photography

Fall or spring. 4 credits. Prerequisite: ART 161 or ARCH 251, or permission of instructor. Staff.

Course in the use of medium- and large-format cameras that explores technique, lighting, and the use of larger-format cameras for personal expression both in the studio and outdoors.

ART 361(3601) Photography III

Fall, spring, or summer. 4 credits. Prerequisite: ART 161, 261, or permission of instructor. Staff.

Continued study of creative use of photography, with emphasis on specialized individual projects.

ART 461(4601) Pre-Thesis in Photography

Fall or spring. 6 credits. Prerequisite: ART 261, 263. Staff.

Studio course intended for photography majors and other qualified students.

ART 462(4602) Thesis in Photography

Fall or spring. 6 credits. Prerequisite: ART 461. Staff.

Studio course intended for photography majors and other qualified students. Advanced photography project to demonstrate creative ability and technical proficiency.

ART 469(4609) Independent Studio in Photography

Fall, spring, or summer. 4 credits, variable. Prerequisites: juniors in good academic standing and written permission of instructor. Staff.

Independent studio in photography that allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide their progress and evaluate their results.

Undergraduate Studio Courses in Printmaking

Fees for printmaking courses:

Intaglio (131, 231, 431, 432, 439): \$95

Screenprinting (132, 232, 431, 432, 439): \$45

Lithography (133, 233, 431, 432, 439): \$95

Expanded Print Forms (134, 234): \$95

ART 131(1301) Introductory Intaglio

Fall and spring. 3 credits. Staff.

Basic introduction to etching techniques, with emphasis on engraving, lift ground, relief printing, monotypes, and experimental techniques.

ART 132(1302) Introductory Graphics

Fall and spring. 3 credits. Staff.

Introduces the two-dimensional thought process and the language of vision. Students explore design projects and the use of graphic materials, including collage, pochoir, and screen printing.

ART 133(1303) Introductory Lithography

Fall and spring. 3 credits. Staff.

Study of the theory and practice of lithographic printing, using limestone block and aluminum plate. Basic lithographic techniques of crayon, wash, and transfer drawing are studied.

ART 134(1304) Expanded Print Forms

Spring. 3 credits. Prerequisite: one of the following: ART 131, 132, 133, 161, 171, 251, or permission of instructor. Staff.

Intensive experimental studio designed to introduce students to various ideas and processes of making artists' books. Encourages the integration of studio practice (photography, printmaking, drawing, and painting) with new digital strategies (digital photography/ink jet print, video/sound, CD-ROM/digital book making). Presents both concept and process as related to the visual book form. An introduction to digital publication as an expanded print form helps students investigate how the book is reinvented or reshaped within an electronic context.

ART 231(2301) Intaglio II

Spring. 4 credits. Prerequisite: ART 131. Staff.

Studio course in advanced etching techniques. Refinement of processes and ideas through the uses of aquatint, spit bite, lift ground, soft ground, and dry point in black and white with an introduction to multiple-plate color printmaking.

[ART 232(2302) Advanced Screen Printing]

ART 233(2303) Lithography II

Spring. 4 credits. Prerequisite: ART 133. Staff.

Theory and practice of lithographic printing using lithographic stones and aluminum plates. Traditional techniques in crayon, tusche wash, and color printing as well as photolithography using kodolith and computer-generated transparencies.

ART 234(2304) Large-Format Digital Printing

Fall and spring. 4 credits. Prerequisites: ART 161, 171, and one of the following: ART 131, 132, 133, 134 or permission of instructor. Staff.

Focuses on the use of digital printing and its use in combination with traditional forms of printmaking. Students explore various approaches to image making while also using traditional materials and media, including relief, monotype, lithography, screen printing, intaglio, transfers, collage, and photo-mechanical processes. Students use appropriate software, including Adobe PhotoShop, Quarkxpress, Final Cut Pro, and Adobe Illustrator to draw from both still and video base sources. Students work with large-format inkjet printers.

ART 331(3301) Printmaking III

Fall or spring. 4 credits. Prerequisite: ART 231, 232, or 233 or permission of instructor. Staff.

Study of the art of graphics through both assigned and independent projects. Work may concentrate in any one of the graphic media or in a combination of media.

ART 332(3302) Printmaking IV

Fall. 4 credits. Prerequisite: ART 331 or permission of instructor. Staff. Continuation and expansion of ART 331.

ART 431(4301) Pre-Thesis in Printmaking

Fall or spring. 6 credits. Prerequisite: ART 332. Staff.

Further study of the art of graphics through both assigned and independent projects executed in various media. Instruction through group discussions and individual criticism.

ART 432(4302) Thesis in Printmaking

Fall or spring. 6 credits. Prerequisite: ART 431. Staff.

Advanced printmaking project to demonstrate creative ability and technical proficiency.

ART 439(4309) Independent Studio in Printmaking

Fall, spring, or summer. 4 credits, variable. Prerequisites: juniors in good academic standing and written permission of instructor. Staff.

Independent studio in printmaking that allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide his or her progress and evaluate the results.

ART 731-732(7301-7302), 831-832(8301-8302) Graduate Printmaking

731, fall; 732, spring; first-year M.F.A. students. 9 credits. 831, fall; 832, spring; second-year M.F.A. students. 9 credits. Staff.

Students are responsible, under faculty direction, for planning their own projects and selecting the media in which they work. Members of the faculty are available for consultation; discussion sessions of work in progress are held.

Undergraduate Studio Courses in Sculpture

Fees for sculpture courses:

141: \$50

241, 341, 342, 343, 441, 442: \$75

ART 141(1401) Introductory Sculpture

Fall, spring, or summer. 3 credits. Staff. Series of studio problems introducing the student to the basic principles of artistic expression in three-dimensions, i.e., clay

modeling, direct plaster, plaster casting, and construction in wood, metal, and other materials.

ART 241(2401) Sculpture II

Fall or spring. 4 credits. Prerequisite: ART 141, or architecture design studio, or permission of instructor. Staff.

Various materials, including clay, plaster, wood, stone, and metal, are used for exercises involving figurative modeling, abstract carving, and other aspects of three-dimensional form and design. Beginning in the second year, students are encouraged to explore bronze/metal casting processes. The sculpture program, which is housed in its own building, contains a fully equipped bronze-casting foundry.

ART 341(3401) Sculpture III

Fall or spring. 4 credits. Prerequisite: ART 241 or permission of instructor. Staff.

Continued study of the principles of sculpture and conceptual development. Each student explores the selection and expressive use of materials, media, scale, and content. Group discussions and individual criticism. Experimentation is encouraged.

ART 342(3402) Sculpture IV

Fall or spring. 4 credits. Prerequisite: ART 341 or permission of instructor. Staff.

Continuation and expansion of ART 341. Special projects may include site-specific and/or large-scale installations.

ART 343(3403) Sculpture V

Fall or spring. 4 credits. Prerequisite: ART 342 or permission of instructor. Staff.

Continued study of the principles of sculpture and the selection and expressive use of materials and media. Group discussions and individual criticism.

ART 441(4401) Pre-Thesis in Sculpture

Fall or spring. 6 credits. Prerequisite: ART 342. Staff.

Further study of the art of sculpture through both assigned and independent projects executed in various media. Instruction through bimonthly group discussions and individual criticism. Students complete a body of work through an approved statement of purpose and proposed schedule.

ART 442(4402) Thesis in Sculpture

Fall or spring. 6 credits. Prerequisite: ART 441. Staff.

Advanced sculpture project to demonstrate creative ability and technical proficiency culminating in a cohesive B.F.A. thesis exhibition.

ART 449(4409) Independent Studio in Sculpture

Fall, spring, or summer. 4 credits variable. Prerequisites: juniors in good academic standing and written permission of instructor. Staff.

Independent studio in sculpture that allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide their progress and evaluate their results.

ART 741-742(7401-7402), 841-842(8401-8402) Graduate Sculpture

741, fall; 742, spring; first-year M.F.A. students. 9 credits. 841, fall; 842, spring; second-year M.F.A. students. 9 credits. Staff.

Students are responsible, under faculty direction, for planning their own projects and selecting the media in which they are to work. All members of the faculty are available for individual consultation. Weekly discussion sessions of works in progress are held.

Special Studio Courses

ART 109(1109) Internship Practicum

Fall, spring, and summer. Variable credit. S-U grades only.

Students serving as interns with art-related businesses or institutions may receive 1 academic credit upon receipt of a letter from the internship sponsor confirming successful performance of internship responsibilities. Students may earn up to 3 hours of nongraded credit for internships and these credits may not be used to fulfill or waive department of art academic and studio requirements.

ART 155(1550) Drawing Rome

Summer. 3 credits. Letter grades only. Staff.

The course introduces students to methods of representing space and form through a study and application of perspective and the effects of light and shade. Uses of line, tone, and color will be investigated. The subject is the city of Rome: its public spaces, churches, museums, archaeological zones, and the residents and visitors who occupy it. A variety of materials are used including pencil, ink, charcoal, pastel and collage. With the exception of one or two in-studio sessions, all work will be done on site. This course is scheduled to be taught initially during the Summer 2006 Art Studio and Creative Writing Workshop in Rome. Course meets four weeks, 5X per week.

ART 372(3702) Special Topics in Art Studio

Fall, spring, or summer. 4 credits, variable. Staff.

Exploration of a particular theme or project.

ART 372.20(3702.20) Special Topics in Art History

Spring. 4 credits, variable. Prerequisite: Rome Program participants. Staff.

Topic TBA.

ART 379(3709) Independent Studio in Rome

Fall and spring. 4 credits, variable. Prerequisites: Rome Program participants; juniors in good academic standing and written permission of instructor. Staff.

Independent studio in Rome that allows non-art majors the opportunity to pursue special interests in fine arts not treated in regularly scheduled courses. The student plans a course of study or projects that meet the approval of the faculty member selected to guide his or her progress and evaluate the results.

ART 389.30(3809.30) Independent Study/Cornell in NYC

Fall, spring, or summer. 4 credits variable. Prerequisite: student in good academic standing and written permission of instructor on an approved independent study form. Staff.

Independent study or studio allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects

under the supervision of a faculty member selected to guide their progress and evaluate their results.

ART 391(3901) Media Arts Studio I (also ARCH 459/659[4509/6509], FILM/DANCE 391[3910])

Fall. 3 credits. Prerequisites: FILM 277 or 377; junior standing and permission of instructor. Lab fee: \$50. Staff.

For description, see FILM 391.

[ART 392(3902) Media Arts Studio II]

ART 400(4000) Rome Studio

Fall or spring. 4 credits. Fulfills 4 credits of concentration requirement.

Prerequisites: Rome Program participants; permission of instructor. Content for Rome studio determined by instructor. Lab fee: \$60; additional fees for photography and printmaking. Staff.

Emphasis is divided between work accomplished in the studio and work executed outdoors in the environs of Rome. Media consist primarily of painting, drawing, sculpture, and photography, or those assigned by the instructor.

ART 479(4709) Independent Studio in Electronic Imaging

Fall, spring, or summer. 4 credits, variable. Prerequisites: juniors in good academic standing and written permission of instructor. Staff.

Independent studio in electronic imaging that allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide his or her progress and evaluate the results.

ART 481(4801) Pre-Thesis in Combined Media

Fall or spring. 6 credits. Prerequisite: written permission of instructor on combined media thesis form (must be received in art department before enrollment in course). Students must enroll in pre-thesis course in their primary area of concentration. Lab fee: \$70. Staff.

Students are responsible, under faculty direction, for planning their own projects and selecting the media in which they work. Projects should reflect experiences gained by exploring and combining various media including those taken in studio courses outside the department. Students select a faculty member from the area of concentration most appropriate to their area of combined media.

ART 482(4802) Thesis in Combined Media

Fall or spring. 6 credits. Prerequisites: ART 481 and written permission of instructor on combined media thesis form (must be received in art department before enrollment in course). Students must enroll in thesis course in their primary area of concentration. Lab fee: \$70. Staff.

Students are responsible, under faculty direction, for planning their own projects and selecting the media in which they work. The projects should reflect experiences gained by exploring and combining various media including those taken in studio courses outside the department. Students select a faculty member from the area of concentration most appropriate to their area of combined media.

ART 489(4809) Independent Studio in Combined Media

Fall, spring, or summer. 4 credits, variable.

Prerequisites: juniors in good academic standing and written permission of instructor. Lab fee: \$70. Staff.

An independent studio in combined media that allows the student the opportunity to pursue special interests not treated in regularly scheduled courses. The student plans study and projects under the supervision of a faculty member selected to guide their progress and evaluate their results.

CITY AND REGIONAL PLANNING

W. W. Goldsmith, chair (106 W. Sibley Hall, 254-5378); S. Baugher, L. Beneria, R. S. Booth, director, UR program; S. Christopherson, J. Chusid, P. Clavel, K. Donaghy, M. Drennan, J. F. Forester, A. Forsyth, R. Kiely, director, Urban Scholars Program, N. Kudva, C. Lai, D. Lewis, B. Lynch, P. Olpadwala, R. Pendall, K. Reardon, S. Saltzman, M. A. Tomlan, R. T. Trancik, M. Warner. Emeriti: S. Czamanski, W. Isard, J. W. Reys, S. Schmidt, S. W. Stein. Visiting: I. Azis, T. Victorisz

The department offers several programs of study at both the undergraduate and graduate levels.

The Undergraduate Program in Urban and Regional Studies

The Program in Urban and Regional Studies (URS) is a four-year academic program aimed at assessing the problems of human communities and regions. Students who graduate from the program receive a bachelor of science degree. The program provides both an excellent liberal arts education and a strong concentration of studies respecting urban and regional issues. The urban and regional studies courses in the program provide students with a broad understanding of relevant issues, the ability to assess those issues, and technical analysis skills. The URS Program is truly interdisciplinary. Students learn to evaluate urban and regional problems by using a wide range of analytic tools and disciplinary perspectives.

Advanced Placement Credit

Students may apply up to two courses of approved advanced placement credit in calculus, computer science, and science toward satisfaction of the distribution requirement in Groups 1 and 2 previously established by the College of Arts and Sciences or in the groups Physical and Biological Sciences (PBS) and Mathematics and Quantitative Reasoning (MQR) currently utilized by the College of Arts and Sciences, provided that they must complete at least one science course during their undergraduate career. They may apply no advanced placement credit toward the distribution requirement in Groups 3 and 4 previously established by the College of Arts and Sciences or toward the distribution requirements in categories currently established by the College of Arts and Sciences in Cultural Analysis (CA); Historical Analysis (HA); Knowledge, Cognition, and Moral Reasoning (KCM); Literature and the Arts (LA); and Social and Behavioral Analysis

(SBA). Grades of S-U courses cannot be applied to the distribution requirements.

Basic Degree Requirements for students in the graduating classes of 2007–2009

URS requirements for graduation include (a) eight semesters of residence; (b) 120 credits; (c) General Education Requirements consisting of writing seminars, qualification in one foreign language, and a series of distribution requirements; (d) required courses for the major; (e) area requirements for the major; (f) free electives; (g) a minimum of 34 courses; and (h) completion of the university requirement of two 1-credit nonacademic courses in physical education. Note: Physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester. No course may satisfy more than one requirement.

More specifically these requirements include:

1. General Education

- First-year writing seminars:* two courses. Students earning a score of 5 on both English literature and English language exams will receive 3 credits (in out-of-college electives) and place out of one first-year writing seminar.
- Foreign language:* three courses or qualification in one foreign language
- Distribution Requirements:* nine courses. Students must take a total of nine courses for the distribution requirement: four courses (of 3 or more credits each) from Groups 1 and 2 specified below, at least two of which are from Group 1, and at least one of which is from Group 2; five courses from Groups 3 and 4 specified below, with at least two in each group and two in the same department. No single course may satisfy more than one distribution requirement. URS students must follow previously established College of Arts and Sciences guidelines specifying courses that meet the requirements for groups 1–4.

Group 1: Physical and biological sciences (two to three courses required)

Group 2: Quantitative and formal reasoning (one to two courses required)

Group 3: Social sciences and history (two to three courses required)

Group 4: Humanities and the arts (two to three courses required)

URS students will be provided a complete listing of courses in Groups 1 through 4 based on requirements previously established for the College of Arts and Sciences. Note: The Arts and Science distribution requirement was changed for entering freshmen in the class of 2007. Rather than selecting courses from Groups 3 and 4, Arts and Sciences students are required to complete five courses in at least four of the following five categories: Cultural Analysis (CA); Historical Analysis (HA); Knowledge, Cognition, and Moral Reasoning (KCM); Literature and the Arts (LA); and Social and Behavioral Analysis (SBA). Social science and humanities courses are marked individually by category, and any given department may offer courses that fall into distinct categories. URS students are encouraged to select their Group 3 and

Group 4 courses from four of these five categories.

URS students may not apply college credit earned before entering Cornell as a freshman to satisfy any distribution course requirement. However, they may petition to have that credit counted toward the 120 total credits required for graduation.

2. Required Courses for the Major: seven courses

CRP 100 The American City (fall, 3 credits)

CRP 101 The Global City: People, Production, and Planning in the Third World (spring, 3 credits)

CRP 106 URS First-Year Seminar (spring, 1 credit)

CRP 200 The Promise and Pitfalls of Contemporary Planning (fall, 3 credits)

CRP 201 People, Planning and Politics in the City (spring, 3 credits)

ECON 101 Microeconomics (fall or spring, 3 credits)

Statistics: One course from a list of statistics courses (fall or spring, 3 credits)

3. Area Requirements: six CRP courses

- Design and Land Use (one course from designated list of courses)
- Urban History, Society, and Politics (one course from designated list of courses)
- Environment (one course from designated list of courses)
- Regional Development and Globalization (one course from designated list of courses)
- Methods for Planning and Urban Studies (one course in Qualitative/Field Methods from designated list of courses).
- Methods for Planning and Urban Studies (one course in Quantitative Methods from designated lists of courses).

Basic Degree Requirements for students in the graduating class of 2010

Students in the Class of 2010 must meet the same requirements as those specified for the classes of 2007–2009 except that they must also complete AAP 111 The World We Make (fall, 1 credit) under required courses for the major.

Basic Degree Requirements for students in the graduating classes of 2011 and beyond

Students in the classes of 2011 and beyond must meet the same requirements as those specified for the class of 2010 except that they must complete their Distribution Requirements (under General Education Requirements) in accord with the Distribution Requirements established for the College of Arts and Sciences: i.e., requirements specifying minimum number of courses and acceptable courses in Physical and Biological Sciences (PBS); Mathematics and Quantitative Reasoning (MQR); Cultural Analysis (CA); Historical Analysis (HA); Knowledge, Cognition, and Moral Reasoning (KCM); Literature and the Arts (LA); and Social and Behavioral Analysis (SBA).

Honors Program

Each year a few well-qualified juniors may join the honors program. Each honors student develops and writes an honors thesis under the guidance of his or her faculty advisor.

Urban Studies Concentration (non-URS majors)

The Urban and Regional Studies concentration has been formulated specifically for those students not enrolled in the Program of Urban and Regional Studies who are interested in complementing their current academic program with an introduction to various facets of urban studies (domestic, environmental, international, professional, urban affairs).

To complete the Urban and Regional Studies (URS) concentration, students must take at least six courses (minimum total of 18 credits) in the Department of City and Regional Planning (CRP). Courses must be completed with letter grade of C or above, as follows:

1. Nine (9) credits of required core courses:

CRP 100 The American City (3 credits)

CRP 101 The Global City: People, Production, and Planning in the Third World (3 credits)

CRP 200 The Promise and Pitfalls of Contemporary Planning (3 credits)

2. Nine (9) credits of elective department courses at the 300 level or higher.

(Please consult department course listings.)

Students meet with their home college faculty advisor. Upon completion of course requirements, students complete a URS concentration application form, available in 106 W. Sibley Hall. The AAP registrar verifies course completion and grades for concentration requirements and signs the application form. The URS program director (who also serves as URS concentration advisor) verifies completion of the concentration, signs the form, and sends a letter (on department letterhead) to the student's home college. The home college will record completion of the URS concentration on the student's transcript.

URS Students in Concentrations Offered by Other Departments

The department recognizes concentrations earned within the university (accepting standards set by various colleges). Students may apply for concentrations in any college (e.g. Africana Studies, Architecture, Latino Studies, Southeast Asian Studies, and Feminist, Gender, and Sexuality Studies). When a student satisfies the requirements for a concentration, and formal notification is received by the AAP registrar, the concentration will be recorded on the student's official transcript.

Off-Campus Opportunities

Cornell in Washington Program. Students in good standing may earn degree credits in the Cornell in Washington program through course work and an urban-oriented externship in Washington, D.C. Students may work as externs with congressional offices, executive-branch agencies, interest groups, research institutions, and other organizations involved in the political process and public policy. Students also select one or two other seminars from such fields as government,

history, economics, human development, architectural history, natural resources, and social policy. Cornell faculty members teach these seminars, which provide credit toward fulfillment of major, distribution, and other academic requirements.

Cornell Abroad. Qualified undergraduates are encouraged to study abroad because exposure to foreign cultures can be an eye-opening aspect of a university education. In an increasingly interdependent world, the experience of living and learning in a foreign country is invaluable. Study-abroad opportunities are continually being developed, and programs are available in many countries. The department encourages URS students to explore these opportunities.

Cornell-in-Rome Program. The College of Architecture, Art, and Planning has a teaching facility in Rome, Italy. Students in good standing can earn degree credits through courses taken with Cornell faculty members assigned to Rome and with accredited instructors. Courses are available in areas of urban development, regional development, and architecture and art.

AAP in New York City. The College of Architecture, Art, and Planning has a teaching facility in New York. In future years the URS Program will have a New York semester for its students.

Research and fieldwork. Students are welcome to work with department faculty members on research or other opportunities that are appropriate to their particular interests. Fieldwork and community-service options also exist for students in the Urban and Regional Studies Program.

Additional Degree Options

Linked degree options. Urban and regional studies students may earn both a bachelor of science degree and a master of regional planning (M.R.P.) degree in a fifth year of study. Ordinarily the professional M.R.P. degree requires two years of work beyond that for the bachelor's degree. Under this option, a minimum of 30 credits and a master's thesis or thesis project are required for the M.R.P. degree. Interested students apply to the Graduate School, usually in the senior year.

Dual-degree options. A student accepted in Cornell's College of Arts and Sciences may earn both a B.A. in a College of Arts and Sciences major and a B.S. in urban and regional studies in a total of five years. Special requirements have been established for this dual-degree program. Cornell students interested in pursuing the dual-degree program should contact either the director of the Urban and Regional Studies Program or the appropriate dean of the College of Arts and Sciences for further information. A similar degree option has been developed with Landscape Architecture in the College of Agricultural and Life Sciences.

Admissions Requirements and Procedures

Among the most important criteria for admission to the Urban and Regional Studies Program are intellectual potential and commitment—a combination of ability, achievement, motivation, diligence, and use of educational and social opportunities. Nonacademic qualifications are important as

well. The department encourages students with outstanding personal qualities, initiative, and leadership ability. Above all, the department seeks students with a high level of enthusiasm and depth of interest in the study of urban and regional issues. Applicants must complete a university admission application. Although an interview is not required, applicants are urged to visit the campus if that is possible. Applicants who want further information regarding the Urban and Regional Studies Program may contact Professor Richard Booth, program director, Urban and Regional Studies, Cornell University, 106 West Sibley Hall, Ithaca, NY 14853-6701, 607-255-4025).

Transfer Students

In most cases, transfer applicants should no longer be affiliated with a high school and should have completed no fewer than 12 credits of college or university work at the time of application. High school students who have completed graduation requirements at midyear and are taking college courses for the rest of the academic year should apply as freshmen. Prospective candidates who believe that their circumstances are exceptional should consult with the director of admissions in the Cornell division of interest to them before filing an application.

Forms for transfer application and financial aid are available from the Cornell University Office of Admissions, 410 Thurston Avenue, Ithaca, NY 14850-2488. Official transcripts of all high school and college work must be submitted along with SAT or ACT scores and letters of recommendation.

Prospective transfer students should have taken at least 6 credits in English. In addition, students should have taken basic college-level courses distributed across the natural and social sciences, humanities, and mathematics. Applicants whose previous course work closely parallels the "General Education" requirements of the Urban and Regional Studies curriculum will have relative ease in transferring. Nevertheless, students with other academic backgrounds, such as engineering, architecture, fine arts, management, and agriculture, are eligible to apply.

Although an interview is not required, applicants are urged to visit the campus if that is possible. Applicants who want further information regarding the Urban and Regional Studies Program may contact Professor Richard Booth, program director, Urban and Regional Studies, Cornell University, 106 West Sibley Hall, Ithaca, NY 14853-6701, 607-255-4025.

The Graduate Program in City and Regional Planning

There are five graduate degree programs in the city and regional planning department. The master of regional planning program (M.R.P.) stresses skills basic to professional planning practice and responds to individual needs and interests. The faculty strongly recommends that students concentrate in one of three areas of planning. The Land Use and Environmental Planning concentration focuses on the forces and actions that directly affect the physical character, transformation, rehabilitation, and preservation of cities and regions. Economic Development Planning: Communities and Regions focuses on the economies of neighborhoods, cities, and

regions with the intent of producing more informed and effective economic development policy. International Studies in Planning (ISP) focuses on urban, regional, and international development processes and their implications for people's lives and livelihoods in diverse international contexts.

The master of professional studies in international development (M.P.S./I.D.) degree is administered jointly with the Cornell International Institute for Food, Agriculture, and Development (CIIFAD). It is intended to meet the specific training needs of experienced planners or midcareer professionals in related fields.

The 60-credit master of arts (M.A.) in historic preservation planning prepares students for professional work in the creative preservation and use of our physical heritage.

The master of science (M.S.) or master of arts (M.A.) degrees in regional science is the study of regional economies and their interactions with each other. Central issues include capital flows, trade, location of economic activity, growth, and regional conflicts. Graduates are positioned for careers as researchers and policy analysts at the highest levels in national governments, corporations, and international organizations.

The doctor of philosophy (Ph.D.) program is for those who seek advanced, specialized education for a career in teaching, research, or policy making.

Off-Campus Opportunities

Rome Program. Graduate students have the opportunity to spend one or two semesters in Rome, studying at Cornell's center at the Palazzo Lazzaroni. Instruction is given by Cornell professors-in-residence and by other faculty. The program is structured to include work assignments in one of the international development organizations headquartered in Rome.

Course Information

Most courses in the Department of City and Regional Planning are open to students in any college of the university who have fulfilled the prerequisites and have the permission of the instructor.

The department attempts to offer courses according to the information that follows. However, students should check with the department at the beginning of each semester for late changes.

Undergraduate Program in Urban and Regional Studies

CRP 100(1100) The American City

Fall. 3 credits. S-U or letter grades for out-of-department students only.

W. W. Goldsmith.

Introductory course on the evolution of urban problems and opportunities facing the majority of this country's population as we enter the first decade of the 21st century. Readings, discussions, and brief papers explore topics ranging from suburban development to central city poverty, from environmental threats to downtown revitalization, and from municipal finance to the new position of women in the urban economy.

CRP 101(1101) The Global City: People, Production, and Planning in the Third World

Spring. 3 credits. S-U or letter grades for out-of-department students only.
N. Kudva.

Critical look at the physical and social development of giant cities in the Third World. Their origins, roles, contributions, and shortcomings are examined. Their place in world political economy is evaluated. Policy prescriptions for their principal problems are discussed.

CRP 106(1106) URS First-Year Seminar

Spring. 1 credit. S-U grades only.
N. Kudva.

Introduces students to substantive issues of the diverse disciplines that make up the planning profession through weekly interaction with CRP and other faculty members in the department. Students have the opportunity to engage in open discussions.

CRP 200(2000) The Promise and Pitfalls of Contemporary Planning

Fall. 3 credits. Prerequisite: CRP 100.
K. Reardon.

Introduction to the historical origins and evolution of the city planning profession in the United States. The theoretical foundation, core values, primary methods, and key challenges facing contemporary planners are examined through a combination of readings, lectures, films, guest speakers, and field trips. Students acquire a deeper understanding of professional practice by working with local officials to develop community development profiles for several Ithaca neighborhoods.

CRP 201(2010) People, Planning, and Politics in the City

Spring. 3 credits. Prerequisites: CRP 100 and 101. J. Forester.

Seminar examining various bases of political and professional power. What do professionals who want to serve the public need to know about power and decision-making processes in the institutional settings in which they operate? How and why can professionals make a difference when facing problems characterized by great complexity and severe inequalities among affected groups? The course addresses these and others questions.

CRP 261(2610) Fieldwork in Urban Archaeology (also LA 261[2610])

Fall. 4 credits. S. Baugher.
For description, see LA 261.

CRP 293(2930) Inequality, Diversity, and Justice (also GOVT 293[2935], SOC 293[2930], PHIL 193[1930])

Fall. 4 credits. R. Miller.
For description, see PHIL 193.

CRP 309(3090) Community Development Seminar (also CRP 509[5090])

Spring. 3 credits. Letter grades.
K. Reardon.

Introduction to the theory, method, and practice of contemporary community development. Topics include: the role community-based organizations are playing in promoting sustainable development in distressed communities; the contribution planners are making to enhancing the organizational capacity of community-based organizations; and the interplay between neighborhood-based community development

activities and regional economic development policy-making.

CRP 318(3810) Politics of Community Development (also CRP 518[5180])

Spring. 3 credits. Letter grades. Staff.
Seminar on city economic development and community institutions. Attention to issues of local politics, planning, housing, and economics. Term papers on field investigations are encouraged. Topics vary from year to year.

CRP 321(3210) Introduction to Quantitative Methods for the Analysis of Public Policy

Spring. 3 credits. Not offered every year.
Staff.

Introduction to the role and use of quantitative methods in the study of urban and regional issues. Focuses on various types of models commonly used to analyze urban and regional policy, including regression models, cost-benefit analysis, simulation, and others. Strengths and weaknesses of those methods are also considered.

CRP 327(3270) Regional Economical Impact Analysis (also CRP 627[6270])

Fall. 3 credits. Letter grades. Staff.
A central concern of practicing planners and economic development professionals is how different events affect the regional economy of concern. Some events are the result of policy choices, such as the closing of a military base or an increase in the local sales tax. Some are the result of exogenous economic forces such as out-migration of population, disasters, natural-floods and hurricanes. This course defines the context, a regional economy, for such analysis, and then presents analytical tools for estimating economic impacts. The major tool covered in depth is regional input-output. Most of the course is devoted to understanding and applying IMPLAN, a software and data system for performing regional input-output analysis at the county level.

CRP 328(3280) Overview: Quantitative Methods in Policy Planning (also CRP 528[5280])

Fall or spring. 3 credits. S-U or letter grades. Staff.

Introduces students to the basic tools that are used in policy analysis. The goal is to set the context for the techniques presented, to understand the questions that each addresses, to be aware of their potential and limitations, their range of applicability, and the pitfalls to be avoided.

CRP 330(3300) Neighborhood Planning Workshop (also CRP 530[5300])

Spring. 4 credits. Letter grades.
K. Reardon.

Offers students the opportunity to collaborate with local residents, leaders, and officials in the development of revitalization plans that address the critical environmental, economic, and social challenges confronting their neighborhoods. A participatory action research approach is used to co-produce professional-quality development plans with local stakeholder groups. Significant fieldwork required.

CRP 331(3310) Social Justice and the City: Preparation for Urban Fieldwork

Spring. 3 credits. Prerequisite: Urban Scholar status or permission of instructor.
Letter grades only. R. Kiely.

Students are introduced to key sociological, economic, historical, and cultural issues embedded in planning for social justice in urban America. Topics include: local realities and micro and macro policies affecting housing, education, immigration, health, legislation, legal affairs, community development, and organizing in a large urban setting. In preparation for field-based learning and research experiences, the challenges of experiential education, public scholarship, and reflective practice will also be addressed both from the perspective of non-profit organizations and local government agencies serving under-resourced urban communities, and the undergraduate student as learner and worker. Students will be exposed to the principles of participant observation, informal/formal interviewing skills, managing field relations, professional ethics, and ethnographic report-writing.

CRP 332(3320) Post-fieldwork Writing Seminar in Urban Policy (also CRP 522[5220])

Fall. 3 credits. Prerequisite: successful completion of Cornell Urban Scholars, Adult Literacy, or Urban Semester Programs or permission of instructor(s).
S-U or letter grades. R. Kiely.

Designed to enhance students' research, writing, analytical, and organizational skills for producing policy-oriented articles that examine vital issues confronting the urban poor. Students will build on prior fieldwork with nonprofit organizations and public agencies.

CRP 343(3430) Affordable Housing Policy and Programs (also CRP 643[6430])

Fall. 3 credits. S-U or letter grades.
R. Pendall.

Overview of federal, state, and local policies and programs to deliver affordable housing to low-income people; public housing, vouchers, inclusionary zoning, rent control, and much more. Lectures, debates, short papers, and term paper.

CRP 354(3540) Introduction to Environmental Planning (also CRP 554[5540])

Fall. 3 credits. S. Schmidt.

Introduction to problems facing planners and decision makers as they attempt to manage and preserve environmental quality in urban and rural settings. Case studies are used to discuss issues related to sustainability, quality of life, environmental hazards, and environmental justice. Students are also introduced to the basic regulatory and institutional aspects of environmental planning and tools and techniques for environmental impact assessment, inventorying, and risk analysis.

[CRP 360(3600) Pre-Industrial Cities and Towns of North America (also LA 260/666[2600/6660], CRP 666[6660])]**CRP 361(3610) Seminar in American Urban History (also CRP 661[6610])**

Fall or spring. 3 credits. Prerequisite: permission of instructor. M. Tomlan.

Seminar in the historical evolution of the American city. Emphasizes factors in urban growth, the process of urbanization, the urban reform movement, and intellectual and social responses to the city.

[CRP 363(3630) American Indians, Planners, and Public Policy (also CRP 547[5470], LA 263/547[2630/5470])]

CRP 365(3650) Gender and Globalization (also FGSS 360[3600])

Fall. 3 credits. L. Beneria.
For description, see FGSS 360.

CRP 368(3680) The History of Urban Form in America (also CRP 668[6680])

Fall or spring. 3 credits. Letter grades.
M. Tomlan.

Covers the history of city planning in America from colonial times to the early 20th century, including brief reviews of European influences on urban form. Lectures, discussions, and short papers.

CRP 370(3700) The Regional Question: The Case of Italy

Spring. 4 credits, variable. Prerequisite: Rome Program participants; majors in urban and regional studies. Staff.
The "regional problem" in Italy has long interested regional planners, economists, sociologists, and political scientists. This course makes use of field trips to the Italian Mezzogiorno and the North to explore theoretical and practical aspects of regional inequality. The question of how Italy's integration into the European Union affects and is affected by its regional issues will be considered.

CRP 372(3720) 20th-Century Italy: Politics and Society

Spring. 3 credits. S-U or letter grades for out-of-department students only. Staff.
Comprehensive survey of Italian society today, starting with Italy's geography and the historical forces that shaped the nation. Discussion includes north-south tensions and such broad features of Italian social life as community structure, urban development, and family forms. The course also reviews selected institutional issues, such as gender, the system of education, problems of criminality and justice, economic reform, social class, religion, and politics.

CRP 376(3760) Latin American Cities (also CRP 676[6760])

Fall. 3 credits. B. Lynch.
This course offers students an opportunity to understand urban dynamics in a rapidly changing region of the world. We ask how colonial powers, the nation-state, and global economic forces have shaped Latin American urban landscapes and the patterns of daily life in the city. The first part of this course explores the social, political, and spatial rural-urban flows, socio-spatial segregation, housing environment and employment. The second half of the course focuses on responses to these social and economic transformations; violence and repression, coping strategies, social movement, and transmigration.

CRP 377(3770) The City in Brazil (also CRP 687[6870])

Summer. 3 credits. S-U or letter grades.
W. Goldsmith.

Students are taught in Brazil by professors from Cornell and the Instituto de Pesquisa e Planejamento Urbano e Regional (IPPUR), at the Federal University of Rio de Janeiro. Students will live in three Brazilian cities, on site with local scholars, top city officials, and activists. In Belem de Para, at the mouth of the Amazon River, the focus is on the environment and development. In Brasilia, the focus is on modernist planning of the new national capital with its signature Plano Piloto, the separated satellites cities, and migration from the Brazilian Northeast. In Rio de Janeiro, the focus is on housing, transportation, and the informal economy in the context of metropolitan growth and decline.

CRP 378(3780) Recycling and Resource Management (also CRP 578[5780])

Spring. 3 credits. S-U or letter grades. Not offered every year. R. Young.
Advanced resource-recycling and management systems are critical to the development of a sustainable society. This course reviews the political, technological, and economic strategies necessary for cities and communities to achieve a closed-loop resource-management system. Drawing from readings, speakers, and field trips that examine the cutting edge of recycling-program development, the course provides students with comprehensive exposure to leading practitioners and best practices in the recycling field. Open to undergraduate and graduate students. Graduate students have additional research requirements.

[CRP 380(3800) Environmental Politics]

[CRP 381(3810) Principles of Spatial Design and Aesthetics (also CRP 581[5810])]

CRP 384(3840) Green Cities (also CRP 584[5840], LA 495[4950])

Fall. 4 credits. S-U or letter grades. Not offered every year. R. Young.
For the first time in history, a majority of human beings live in cities. As a result, any realistic solution to the global ecological crisis will need to include strategies for urban life that are ecologically sound. This course examines the history and future of urban ecology and the technology and politics that shape it. Alternative transportation, renewable energy, urban design, recycling and resource management, and sustainable economics are explored as means toward transforming cities to become the basis of a new, ecological society. Open to both graduate and undergraduate students. Graduate students have additional research requirements.

CRP 386(3860) Planning for Sustainable Transportation (also CRP 686[6860])

Spring. 3 credits. S-U or letter grades.
Staff.
Explores issues related to sustainable transportation policy and practice. The course (1) provides an overview of current transportation trends and their impacts; (2) reviews themes such as planning history and politics, the problems with auto-dominated systems, and key challenges to development sustainable transport systems; and (3) looks at regulatory, design, and market-based approaches to reducing automobile-dependency, introducing creative sustainable solutions from around the world.

CRP 390(3900) Professional Planning Colloquium I (also CRP 790[7950])

Fall. 1 credit. Staff.
Visiting lecturers address problems and opportunities in the practice of planning. Topical focus to be announced. The only formal requirements for the course are attendance and a three- to five-page paper about the lecture series.

CRP 395(3850) Special Topics (also CRP 585[5850])

Fall, spring, summer. 4 credits, variable.
Times TBA. Staff.
For description, see department coordinator, 106 West Sibley Hall.

CRP 395.02(3850) Asian American Politics and Public Policy (also CRP 679.02[5850], AAS 390[3900])

Spring. 3 credits. C. Lai.
This lecture course examines key political and public policy issues affecting Asian American communities, such as immigration law, racial profiling, labor struggles, and electoral politics. We pay particular attention to political mobilization efforts of different Asian ethnic groups and examine how these groups have organized, framed their issues, and mobilized in terms of space, place, and spatial scale.

CRP 395.03(3850) Race, Space, and Place (also CRP 679.03[5850], AAS 395.01[3950])

Spring. 3 credits. C. Lai.
This seminar examines critical theories of race and space and investigates key sites where racial formation and spatial production intersect. These multiscalar sites include the neoliberal city, the prison industrial complex, and the Mississippi Delta. We analyze not only the fatal coupling of difference, power, and space, but also the spatial politics of resistance and refusal.

CRP 395.03(3850) Wilderness and Wildlands: Issues in Policy and Planning (also CRP 679.03[5850])

Fall. 2-3 credits, variable. Graduate seminar open to juniors and seniors. Not offered every year. L. Thorndike.
Wilderness and wildland resources have been under assault by the Congress, the "Wise Use" movement, property-rights activists, pollutants, and the actual users. This seminar considers historical and philosophical foundations and political factors that affect decisions about wilderness policies, planning, acquisition, protection, and management. The roles of government, professional planners and managers, organized special interests, the legal system, citizens, and user groups are examined. Practical exposure to planning and policy development through readings, discussions, guest practitioners, and a field trip to the Finger Lakes National Forest. Optional weekend trip to Adirondack Park Wilderness area.

CRP 395.04(3850) Pursuing a Municipal Policy Agenda Promoting Prosperity, Equity, and Sustainability

Fall. 3 credits. Letter grades only.
Offered in New York City. J. Nettleton.
Students will investigate the structural changes taking place in the New York regional economy and the impact these changes are having on the spatial structure of the city. This background information will be used to identify the major environmental, economic, and social policy issues

confronting local civic leaders. Special attention will be given to policy questions that affect economic growth, income and wealth distribution among social groups, environmental sustainability, and citizen participation in policy-making.

CRP 395.05(3850) Remaking of New York City: Identity Formation, Image Making, and Community Building in the City's Newest Immigrant Communities

Fall. 3 credits. Letter grades only. Offered in New York City. S. Beck.

Students will learn about the history, culture, politics, and social life of NYC's newest immigrant communities through an immersion in the contemporary art, poetry, stories, and dance being produced by its most prolific young artists. Weekly visits to the studios, galleries, and performance spaces of these communities will be a central aspect of this experientially based course.

CRP 395.09(3850) The Asian American Urban Experience: Past, Present, and Future (also CRP 629.09[5850], AAS 380[3800])

Fall. 3 credits. C. Lai.

The seminar examines the histories and geographies of urban Asian American communities. We begin with an introduction to key geographical terms and spatial theories and then use them to analyze different Asian ethnic communities throughout North America. This includes an investigation of 19th and early 20th-century segregated ethnic enclaves on the West Coast and the East Coast as well as an examination of postwar Asian American communities in suburbs.

CRP 395.14(3850) The Museum and the Public (also CRP 669.14[5850])

Spring. 3 credits. J. Chusid.

Evaluates different types of museums (art, science, history, arboreta etc.), and their constantly evolving missions in contemporary societies. The material is addressed through site visits, lectures by faculty and guests, readings, case studies and a team semester-long project. Issues covered include the nature of collections; the nature of the audience; the purpose and role of museums; political and cultural questions about collecting, history and interpretation; governance and management; and the core ethical and intellectual values and positions implied or expressed by the institutions. Students will also undertake a comprehensive planning project for a local museum, to be presented to the client at the end of the semester.

CRP 395.17(3850) Property and Expropriation (also CRP 629.17[5850], AAS 394[3940])

Fall. 3 credits. C. Lai.

This seminar examines past and present day seizure of land, resources, and ways of life as well as resistance against such seizures. We begin with an examination of colonial conquest and the expropriation of the English commons in the 17th and 18th centuries and conclude with contemporary anti-globalization struggles against privatization. Our reading will come from social history, political geography, and ethnic studies.

CRP 395.18(3850) Suburbia (also CRP 659.18[5850])

Fall. 3 credits. Open to juniors, seniors, and graduate students. A. Forsyth.

Cultural commentators love to hate suburbia but the suburban parts of metropolitan areas are expanding around the globe. Readings, films, and lectures will cover topics including suburban history, design, planning, ecology, social organization, politics, and culture. Students will use photography, mapping, discussions, and brief papers to develop their own views of suburbia.

CRP 395.19(3858) Health and Cities (also CRP 659.19[5850])

Spring. 3 credits. Open to juniors, seniors, and graduate students. A. Forsyth.

Focusing on the relationship between planning, urban design, and public health, the course covers a range of issues facing urban areas, from water quality and social capital to physical activity. Readings, discussions, brief papers, and a community-based project will help students bridge the gap between the emerging research base on health and design and the realities of improving health in particular places and communities.

CRP 395.23(3850) Community Urban Design Workshop (also CRP 659.23[5850])

Spring. 4 credits. Open to upper-level undergraduates and graduate students.

A. Forsyth.

Small area planning gives an opportunity to combine urban design techniques and participatory neighborhood planning approaches. Working with community residents and other stakeholders, students will create a physical plan that reflects community values and culture, planning and development realities, and local history and landscape. Course emphasizes communication and implementation. Significant fieldwork required.

CRP 395.24(3850) European Cities and Sustainable Development (also CRP 649.24[5850])

Spring. 3 credits. S. Schmidt.

This course will examine sustainable development as practiced in European cities and regions, with a particular focus on how these initiatives and situations compare with the United States. Topics include: The historical and institutional context for sustainable urban development in Europe, land use, transportation, Green urbanism, urban ecology, energy consumption, and the environmental impact of deindustrialization, EU expansion, and climate change policy.

CRP 404(4040) Urban Economics (also CRP 504[5040])

Spring. 4 credits. Prerequisite:

microeconomics course. K. Donaghy.

Analyzes urban phenomena from an economic point of view. Areas examined include economic aspects of urbanization processes and policies, determinants of urban growth and decline, urban land and housing markets, urban transportation, and urban public services. Some time is spent in discussing problems of cities in developing countries.

CRP 408(4080) Introduction to Geographic Information Systems (GIS) (also CRP 508[5080])

Spring. 4 credits. S. Schmidt.

Geographic Information Systems (GIS) have revolutionized the way we manage, analyze, and present spatial information. This course focuses on GIS in the social sciences. Many

of the exercises and examples are based on planning issues, but the concepts can be applied to many other disciplines such as government, economics, natural resources, and sociology. Some of the issues covered include: fundamentals of spatial analysis; overview of GIS technology and applications; designing a GIS project; gathering and analyzing data; and creating thematic maps.

CRP 412(4120) Devolution, Privatization, and the New Public Management (also CRP 612[6120], AEM 433/633[4330/6330], FGSS 411/611[4110/6110])

Fall. 4 credits. Prerequisite: ECON 101 or equivalent. S-U or letter grades. Offered every other year. M. Warner.

Addresses devolution and decentralization of government services in a national and international context and then focuses on the local public-sector response in the United States. Privatization, intermunicipal cooperation, and internal restructuring are reviewed, including changing roles for the private sector, nonprofit sector, and unions. Implications for policy, program design, public advocacy, and citizen involvement are addressed. A special topic may include welfare reform. Graduate students are expected to write a major research paper in addition to short papers throughout the semester.

CRP 416(4160) European City: The Public Sphere and Public Space

Spring. 4 credits, variable. Enrollment may be limited by instructor. Prerequisite: junior or senior standing; Rome Program participants. S-U or letter grades for nonmajors. Staff.

Examination of the social, economic, and political life of the European city, particularly Italian cities, especially Rome. Study of the socioeconomic underpinnings of the city. How are cities organized, and how do citizens relate to the state; the city to the nation; the nation to the global market? How and where do different groups of people live? How do they travel, inside the city and from city to city? How are new parts of the city developed and old ones preserved, transformed, or destroyed? What public services do people expect, and how are they delivered? What is the role of private business? How do Italians/Europeans confront problems of the urban environment, poor neighborhood services, and impoverished immigrants? In all these cases, how do Italian (or European) conditions and policies differ from those in the United States (or elsewhere)?

CRP 417(4170) Economic Development: Firms, Industries, and Regions (also CRP 517[5170])

Fall. 4 credits. S. Christopherson.

Economic development policy in the United States has focused historically on the provision of subsidies to individual firms. As the limitations of this strategy have become more apparent, alternative approaches including multifirm and workforce development are being implemented. This comparative course draws on cases from a variety of industries and national contexts. Particular attention is paid to economic development issues and policies in New York State.

CRP 444(4440) Resource Management and Environmental Law (also CRP 544[5440], NTRES 444[4440])

Spring. 4 credits. Prerequisite: junior, senior, or graduate standing and permission of instructor. R. Booth.

Introduces the application of legal concepts and processes to the management of natural resources and natural-resource areas. Explores the role of the common law, statutory law, administrative regulations, and judicial decisions in managing these resources. Particular focus is given to the management of wildlife, wetlands, and critical resources on public lands, and to the conflicts inherent in government attempts to regulate important natural resources on private lands.

CRP 448(4480) Social Policy and Social Welfare (also CRP 548[5480])

Spring. 4 credits. Not offered every year. S. Christopherson.

Addresses conceptual issues underlying social policy and the provision of social welfare and analyzes how different positions are reflected in a set of current social-welfare controversies. The first part of the course introduces principles that guide the development of social policy, including fairness and justice. Various conceptions of society are examined with reference to their influence on the nature and extent of social-welfare provision, comparing the United States with other industrialized countries. The second part examines how economic change and government policy affect social provision in the United States.

[CRP 451(4510) Environmental Law (also CRP 551[5510])

Fall. 4 credits. Next offered 2008-2009. R. Booth.]

CRP 453(4530) Environmental Aspects of International Urban Planning (also CRP 683[6830])

Fall. 4 credits. Open to advanced undergraduate and graduate students in planning, environmental studies, and related social and natural sciences. B. Lynch.

This seminar examines the ways in which roles of diverse environmental actors—international organizations, national bureaucracies, scientific communities, NGOs, and social movement organizations—formulate environmental debates and design conservation and remediation programs and policies in the Third World.

CRP 457(4570) Community Service Fieldwork

Fall or spring. 4 credits, variable. Prerequisite: permission of instructor. Staff.

Undergraduate students work under the direction of a faculty member in the CRP department on a project that assists a public or nonprofit organization. Projects involve urban and regional issues as defined by a client and agreed upon by the faculty member.

CRP 459(4590) Legal Aspects of Land Use Planning (also CRP 559[5590])

Spring. 4 credits. R. Booth.

Survey of leading cases and legal concepts in land-use planning, with particular attention to zoning, subdivision control, condemnation, and growth-control issues.

CRP 474(4740) Urban Transformations in the Global South (also CRP 674[6740])

Fall or spring. 4 credits. S-U or letter grades. W. Goldsmith.

Economic globalization and the post-colonial political order are continually reshaping urban societies and landscapes in the global South, often by relegating everyday life to the margins and shrouding it in illegality. This course focuses on the spatial, social, and political dimensions of urban transformations, paying particular attention to such topics as competition among cities for international capital and its implications for sociospatial organization; dynamic interrelations between informality in labor markets and in housing urban environmental challenges and municipal efforts to address them; and issues related to governance, social movements, and new formulation of citizenship.

CRP 477(4770) Issues in African Development (also CRP 677[6770])

Fall and spring. 1 credit. S-U grades only. M. Ndulo.

Examines a broad range of critical concerns in contemporary Africa including food production, human resource development, migration, urbanization, environmental resource management, economic growth, and policy guidance. The weekly presentations are made by invited specialists. Students are required to write a term paper.

CRP 490(4900) Student-Faculty Research

Fall or spring. 4 credits, variable. Prerequisite: undergraduates in Urban and Regional Studies Program. S-U grades only. Staff.

Research, reading, and/or writing project in which a student and faculty member choose a topic related to urban and regional studies.

CRP 492(4920) Honors Thesis Research

Fall or spring. 4 credits. Prerequisite: Urban and Regional Studies Program majors who have been selected as honor students by department faculty. Staff. Each selected student works with his or her thesis advisor.

CRP 493(4930) Honors Thesis Writing

Fall or spring. 4 credits. Prerequisite: CRP 492. Staff.

Each selected student works with his or her thesis advisor.

CRP 494(4940) Professional Practice Seminar: New York City

Fall. 12 credits, variable. Offered in New York City. K. Reardon.

Students will work with program faculty in devising a detailed learning plan that identifies the new knowledge, skills, and capacities they seek to gain through their New York City-based professional internship experience. Students will be placed in public, private, and non-profit organizations where they will engage in challenging professional activities designed to assist them in acquiring these new competencies. Students will participate in a weekly reflective seminar where they will systematically reflect upon their field-based learning experiences to prepare them to complete a detailed learning portfolio and capstone project through which they can demonstrate their mastery of the theoretical, conceptual, methodological, and policy content identified in their individualized learning plans. Students will

be introduced to key concepts and methods in adult learning, experiential education, field-based research methods, and organizational behavior to empower them to function as both self-directed and reciprocal learners.

CRP 497(4970) Independent Study

Fall or spring. 4 credits, variable. Prerequisite: junior or senior standing; permission of instructor. Staff.

Graduate Courses and Seminars

Courses numbered from 500 to 599 and 600 to 699 are generally considered introductory or first-year courses; those numbered from 700 to 799 and 800 to 899 are generally considered more advanced. Upper-level undergraduate courses are numbered from 300 to 499. (Undergraduate students with the necessary prerequisites and permission of the instructor may enroll in courses numbered 500 and above.)

CRP 504(5040) Urban Economics (also CRP 404[4040])

Spring. 4 credits. Not offered every year. Prerequisite: microeconomics course. K. Donaghy.

For description, see CRP 404.

CRP 508(5080) Introduction to Geographic Information Systems (GIS) (also CRP 408[4080])

Spring. 4 credits. S. Schmidt.

For description, see CRP 408.

CRP 509(5090) Community Development Seminar (also CRP 309[3090])

Spring. 3 credits. K. Reardon. For description, see CRP 309.

CRP 512(5120) Public and Spatial Economics for Planners

Spring. 3 credits. No prior knowledge of economics necessary. I. Azis.

Covers basic microeconomic theory and some topics in macroeconomics. What distinguishes it from foundation courses in economics is that the context of every topic is both spatial and public. The concept of space is central to city and regional planning. The perspective of the public and nonprofit sectors is the same as that of city and regional planning. Both space and the public-nonprofit sectors are peripheral to (or absent from) the usual graduate foundations courses in economics. The course also covers the economic theory necessary to understand the many applications of economics presented in subsequent courses in city and regional planning.

CRP 513(5130) Introduction to Planning Practice and History

Fall. 4 credits. J. Forester.

Introductory graduate seminar on the theory and history of planning, administration, and related public intervention in urban affairs. Topics are analyzed from the perspective of the political economy of the growth and development of cities. Students improve their understanding of the planning process and of the urban application of the social sciences, get practice in writing, and explore one research topic in depth.

CRP 517(5170) Economic Development: Firms, Industries, and Regions (also CRP 417[4170])

Fall. 4 credits. S. Christopherson. For description, see CRP 417.

CRP 518(5180) Politics of Community Development (also CRP 318[3180])

Spring. 3 credits. P. Clavel.
For description, see CRP 318.

CRP 519(5190) Urban Theory and Spatial Development

Spring. 3 credits. W. Goldsmith.
Surveys theories on the existence, size, location, and functioning of cities and their metropolitan areas in rich and poor regions of the world. Considers orthodox/conservative treatments as well as critical/left-wing perspectives of planners, geographers, economists, sociologists, and political economists. These theories are indispensable for understanding the origins of cities, the persistence of urban and regional spatial patterns, and the distinctive nature of urban problems.

CRP 520(5200) Statistical and Mathematical Concepts for Planning

Fall. 3 or 4 credits. Not offered every year. Staff.

Introduction to statistical and mathematical concepts and methods of importance in planning and policy analysis. Topics include matrix algebra, probability, sampling, estimation, and regression, and the use of a microcomputer statistical package.

CRP 521(5210) Mathematical Foundation for Planning Analysis

Fall. 1 credit. Meets for two hours, once each week, for approximately half the semester. Prerequisite: permission of department. S-U grades only. Not offered every year. Staff.

Review of mathematical foundations for planning analysis. Topics include probability statistics, mathematical functions, and matrix algebra. Intended for students with prior course work as a refresher course in preparation for higher-level courses in planning analysis.

CRP 522(5220) Post-Fieldwork Writing Seminar in Urban Policy (also CRP 332[3320])

Spring. 3 credits. Prerequisite: successful completion of Cornell Urban Scholars, Adult Literacy, or Urban Semester Programs or permission of instructor(s). S-U or letter grades. R. Kiely.
For description, see CRP 532.

CRP 525(5250) Introductory Methods of Planning Analysis

Fall. 4 credits. R. Pendall.
Quantitative and qualitative analysis of neighborhoods, cities, and regions. Focus is on data from various regions of the United States, but tools are applicable throughout the world. They include: descriptive and inferential statistics, mapping, and observation. Required lab exposes students to essential microcomputer applications and builds skills in writing and analysis.

CRP 528(5280) Overview: Quantitative Methods in Policy Planning (also CRP 328[3280])

Fall and spring. 3 credits. S-U or letter grades. Staff.
For description, see CRP 328.

CRP 529(5290) Mathematics for Planners

Fall. 4 credits, variable. S-U or letter grades. Not offered every year. Staff.

Covers basic mathematical concepts and techniques—with an emphasis on calculus—needed by the student who wishes to take intermediate-level courses in economics, urban and regional analysis, quantitative methods for the social sciences, and policy analysis. Topics include: matrix algebra, set theory, functions, differentiation, and integration.

CRP 530(5300) Neighborhood Planning Workshop (also CRP 330[3300])

Spring. 4 credits. K. Reardon.
For description, see CRP 330.

CRP 532(5320) Real Estate Development Process

Fall. 3 credits. Letter grades. Fee for case studies packet. B. Olson.
Examination of various forms of development as well as the role of major participants in the processes. Reviews issues in residential, retail, industrial, office, and low-income housing projects. Guest speakers and case studies included.

CRP 533(5330) Real Estate Marketing and Management

Fall. 3 credits. R. Abrams.
Focuses on the tenant or user as the basic source of the value of real estate. Students explore the characteristics and needs of tenants, and how the ownership and management of buildings respond to these needs. Multifamily residential and office buildings are the principal focus of the course. Topics include marketing research, examination of tenant types, locations, building services and operations, negotiation of lease agreements, marketing campaigns, and governmental regulations. Guest speakers and case studies included.

CRP 537(5370) Real Estate Seminar Series

Fall and spring. 0.5 credit each semester.
Prerequisite: M.P.S./R.E. students. S-U grades only. D. Funk.
Designed to bring students weekly into direct contact with real-estate professionals mainly through the use of videoconferences originating from locations around the world.

CRP 544(5440) Resource Management and Environmental Law (also CRP 444[4440], NTRES 444[4440])

Spring. 4 credits. R. Booth.
For description, see CRP 444.

CRP 546(5460) Introduction to Community and Environmental Dispute Resolution

Fall. 3 credits. J. Forester.
Explores the theories and techniques of dispute resolution as they apply to community, environmental, and related public-policy disputes. Analysis complements skill-building. Issues of power, participation, and strategy are central to our examinations of negotiation and mediation practice.

[CRP 547(5470) American Indians, Planners, and Public Policy (also CRP 363[3630], LA 263/547[2630/5470])]**CRP 548(5480) Social Policy and Social Welfare (also CRP 448[4480])**

Spring. 4 credits. Not offered every year. S. Christopherson.
For description, see CRP 448.

[CRP 551(5510) Environmental Law (also CRP 451[4510])]**CRP 552(5520) Land-Use Planning**

Fall. 3 credits. R. Pendall.
Covers surveys, analyses, and plan-making techniques for guiding physical development of urban areas, location requirements, space needs, and interrelations of land uses. Emphasizes residential, commercial, and industrial activities and community facilities, and housing and neighborhood conditions. Lectures, seminars, and field exercises.

CRP 553(5530) Land-Use Regulations

Spring. 3 credits. R. Pendall.
This seminar covers the essentials of "smart growth," zoning, and subdivision, and the main tools for implementing a land-use plan. Also covers agriculture and open-space preservation, infrastructure-timing controls, redevelopment, and planned-unit development.

CRP 554(5540) Introduction to Environmental Planning (also CRP 354[3540])

Fall. 3 credits. S. Schmidt.
For description, see CRP 354.

CRP 555(5550) Urban Systems Studio (also LA 701[7010])

Fall. 5 credits. Prerequisite: permission of instructor. R. Trancik.
Application of urban-design and town-planning techniques to specific contemporary problems of city environments. Issues of urbanism are investigated and applied to physical-design interventions involving the street, square, block, garden, and park systems. Topics include urban land-use development, spatial systems and aesthetics, and public and private implementation of urban-design plans. Computer modeling and digital-design media are introduced as tools for urban design. This is a specially arranged collaborative studio with the Landscape Architecture Program.

CRP 556(5560) Design in Real Estate Development

Spring. 3 credits. S-U or letter grades. H. Richardson.
Provides a basic understanding of the importance of design in real estate development. The role of the architect and other design professionals is considered from the initial needs assessment through project implementation. Fundamentals involved in defining, stimulating, and recognizing quality in design are addressed. The analysis of case-study presentations by guest speakers examine the methods and procedures employed to achieve quality design and how this can create added value to development.

CRP 557(5570) City Planning Design Studio

Spring. 4 credits. Prerequisite: design courses or permission of instructor. Staff.
Series of individual and team small-area design projects at district, neighborhood, and project scale. The course objective is to develop an understanding of the spatial issues, knowledge, and skills needed to design for the functional, aesthetic, social, and cost needs of urban communities. Studio projects, field trips, and reading.

CRP 558(5580) City and Regional Planning Workshop

Fall or spring. 4 credits, variable. S-U or letter grades. Staff.

Students work on urban issues, such as housing, traffic and parking, economic development, zoning, and related planning issues with public or nonprofit organizations in New York State. Projects are undertaken on a community-service basis for "clients" who specifically request planning assistance. Students work individually or in teams.

CRP 559(5590) Legal Aspects of Land Use Planning (also 459[4590])

Spring. 4 credits. R. Booth.
For description, see CRP 459.

CRP 560(5600) Documentation for Preservation

Fall. 3 credits. M. Tomlan.
Methods of identifying, recording, collecting, processing, and analyzing information dealing with historic and architecturally significant structures, sites, and objects.

CRP 561(5610) Historic Preservation Planning Workshop: Surveys and Analyses

Fall. 4 credits. Staff.
Covers techniques for the preparation of surveys of historic structures and districts; identification of American architectural styles, focusing on upstate New York; and explorations of local historical resources, funding sources, and organizational structures. Lectures and training sessions. Emphasizes fieldwork with individuals and community organizations.

CRP 562(5620) Perspectives on Preservation

Fall. 3 credits. J. Chusid.
Introductory course for preservationists. A survey of the historical development of preservation activity in Europe and America leading to a contemporary comparative overview. Field trips to notable sites and districts.

CRP 563(5630) Problems in Contemporary Preservation Practice

Spring. Variable credit. J. Chusid.
Review and critique of ongoing preservation projects and an investigation of areas of expertise currently being developed. Presented by staff and guest lecturers.

CRP 564(5640) Building Materials Conservation

Spring. 3 credits. Prerequisite: junior, senior, or graduate standing. J. Chusid.
Survey of the development of building materials in the United States, chiefly during the 19th and early 20th centuries, and a review of the measures that might be taken to conserve them.

CRP 565(5650) Fieldwork or Workshop in History and Preservation

Fall or spring. Variable credit. Staff.
Work on applied problems in history and preservation planning in a field or laboratory setting or both.

CRP 566(5660) Planning and Preservation Practice

Fall. 1 credit. Prerequisite: graduate standing in CRP programs or M.P.S./R.E. or permission of instructors. S-U grades only. R. Pendall and M. Tomlan.
Students participate in field study of city planning, historic preservation, economic and community development, and real estate issues in large Eastern U.S. cities.

CRP 567(5670) Measured Drawing

Spring. 3 credits. Prerequisite: undergraduate architecture students and graduate students in history and preservation. J. Chusid.
Combines study of architectural drawing as historical documents with exercises in preparing measured drawings of small buildings. Presents the basic techniques of studying, sketching, and measuring a building and the preparation of a finished drawing for publication.

[CRP 569(5690) Archaeology in Preservation Planning and Site Design (also LA 569[5690])]

CRP 578(5780) Recycling and Resource Management (also CRP 378[3780])

Spring. 3 credits. S-U or letter grades.
R. Young.
For description, see CRP 378.

[CRP 581(5810) Principles of Spatial Design and Aesthetics (also CRP 381[3810])]

CRP 584(5840) Green Cities (also CRP 384[3840], LA 495[4950])

Fall. 4 credits. S-U or letter grades. Not offered every year. R. Young.
For description, see CRP 384.

CRP 585(5850) Special Topics (also CRP 385[3850])

Fall, spring, or summer. 4 credits, variable.
Times TBA. Staff.
For description, see department coordinator, 106 West Sibley Hall.

CRP 605(6050) Urban Public Finance

Fall. 4 credits. Prerequisite: exposure to microeconomics. Not offered every year. Staff.
Overview of neoclassical public-economics theory, particularly those aspects of the theory that are central to urban public finance. The unusual three-tiered fiscal system of the United States is described along with the evolving fiscal and economic role of large municipal governments. Also presented is the public-finance theory of taxation. Major taxes and other revenue sources used by large municipalities are described and analyzed. The heart of the matter is the measurement and analysis of the fiscal condition of cities.

CRP 607(6070) GIS Applications Workshop

Fall. 4 credits. Prerequisites: introductory GIS course or permission of instructor. Staff.

Advanced GIS course that focuses on GIS applications and projects for one or more clients. During some semesters students work on their own projects. Contact the instructor directly to learn about project options for the current semester.

CRP 612(6120) Devolution, Privatization, and the New Public Management (also CRP 412[4120], AEM 433/633[4330/6330], FGSS 411/611[4110/6110])

Fall. 4 credits. Prerequisite: ECON 101 or equivalent. S-U or letter grades. Offered every other year. M. Warner.
For description, see CRP 412.

CRP 614(6140) Gender and International Development (also FGSS 614[6140])

Spring. 3 credits. L. Beneria.

The four main objectives are to (1) analyze the location of women in development processes and to understand the centrality of gender in each case; (2) examine theoretical and conceptual frameworks for the analysis, including an understanding of gender divisions and their interaction with other forms of inequality such as class, race, and ethnicity; (3) reflect upon the linkages between the global economy and the macro and micro processes of development from a gender perspective; and (4) provide a basis for research, practical action, and policy formulation and for evaluating directions and strategies for social change.

CRP 615(6150) Current Issues and Debates on NGOs

Fall. 3 credits. Prerequisite: graduate standing or permission of instructor. S-U or letter grades. N. Kudva.
This seminar examines a range of topics that are key to understanding NGO actions: their effectiveness at service provision and advocacy; their political role in constructing social capital and strengthening civil society; their relationship with the state and with donor agencies; and issues related to organizational design for success. The intention is to gain a broad-based understanding of the role and development of NGOs. The emphasis throughout will be to critically evaluate the literature, research, and accounts on NGOs as both institutional actors in the development arena and as bounded organizations at the local level: a task that is complicated by the heterogeneity of contexts and organizational types.

CRP 621(6210) Quantitative Techniques for Policy Analysis and Program Management

Spring. 4 credits. D. Lewis.
Examines selected analytical techniques used in the planning and evaluation of public policy and public investments. Topics include simulation modeling, benefit-cost and cost-effectiveness analysis (including capital budgeting), and optimization strategies.

CRP 627(6270) Regional Economic Impact Analysis (also CRP 327[3270])

Fall. 3 credits. Letter grades. Staff.
For description, see CRP 327.

CRP 629.09(5850) The Asian American Urban Experience: Past, Present, and Future (also CRP 395.09[3850], AAS 380[3800])

Fall. 3 credits. C. Lai.
For description, see CRP 395.09.

CRP 629.17(5850) Property and Expropriation (also CRP 395.17[3850], AAS 395.17[3950])

Fall. 3 credits. C. Lai.
For description, see CRP 395.17.

CRP 632(6320) Methods of Regional Science and Planning I

Spring. 4 credits, variable. Staff.
Introduction to some of the major methods and models used in regional science and planning. Topics related to the structure and assumptions of the models, model development, and their applications in regional science and planning are discussed. Where appropriate, computer implementation emphasizing statistical, econometric models is considered.

CRP 635(6350) Workshop: State Economic Development Strategies

Fall or spring. 4 credits. S-U or letter grades. S. Christopherson.

The purpose of this workshop is twofold: (1) to provide students with research tools useful in developing state-level economic-development strategies; and (2) to provide a critical understanding of the primary economic-development strategy used by U.S. state policymakers: firm-specific subsidies. The course consists of lecture and discussion meetings. The workshop sessions include exercises in qualitative information gathering on economic-development topics; use of the census in combination with geographic information systems for analysis and presentation; and shift-share analysis.

[CRP 637(6370) Regional Development Planning: An International Perspective]**[CRP 638(6380) Planning and the Global Knowledge Economy: Sustainability Issues]****CRP 642(6420) The Micro-Politics of Participatory Planning Practices**

Spring. 4 credits, variable. J. Forester.

This seminar explores issues of "practice" (rhetoric and negotiation, interpretation and judgment, narrative and recognition) as they influence democratic deliberations involving questions of ethics and argument, participation and identity, historical trauma and working-through, and more. The approach taken can be called a "critical pragmatism." Practitioners' oral histories are used to investigate the challenges of participatory planning practices.

CRP 643(6430) Affordable Housing Policy and Programs (also CRP 343[3430])

Fall. 3 credits. S-U or letter grades. R. Pendall.

For description, see CRP 343.

CRP 649.24(5850) European Cities and Sustainable Development (also CRP 395.24[3850])

Spring. 3 credits. S. Schmidt.

For description, see CRP 395.24.

CRP 655(6550) Real Estate Project Workshop

Spring. 4 credits. Prerequisite: permission of instructor. Fee for mandatory field trip. D. Chiazza and H. Richardson.

Students are asked to undertake the preparation of reports analyzing various aspects of real estate activity. Individual and team working relationships are required. A range of types of problems that may be encountered in the real estate field is addressed, including project feasibility, marketing, planning and design, and legal constraints and concerns. Projects focus on real-world case studies and require professional-level reports suitable for oral and written presentations.

CRP 656(6560) Real Estate Transactions and Deal Structuring (also LAW 679[6792])

Spring. 3 credits. S-U or letter grades. D. Funk.

Real estate transactions and deal structuring will examine real estate deals through a practitioner perspective within a case study and transactional approach. The course looks at the transactional components and

structuring of real estate deals and related parties at each step in creating value from real estate, including acquisition and assemblage; due diligence; sourcing and financing; structuring the venture/parties; operation; disposition; and tax consequences. Additional issues within deal structuring that may be included are negotiation, managing risk including litigation and environmental issues, analysis of financing techniques, and consequences when deals go bad, including workouts and bankruptcy. The case study format will address deals from the perspectives of investment fund manager, banker/lender, developer, REIT, joint venture partner/investor, and owner. The course will include assignments and exercises where students analyze real estate transactions, prepare and negotiate documents, and present transactions and deals to review entities.

CRP 657(6570) Real Estate Law

Spring. 3 credits. Letter grades. A. Klausner.

Examination of major legal concepts pertaining to acquisition, use, management, and transfer of real estate. Particular focus is on important legal considerations pertaining to property rights, contracts, and public controls on the use of land. Consideration of important case law, statutory law, and rules and regulations. Current legal issues affecting the real estate industry are discussed.

CRP 658(6580) Residential Development

Spring. 4 credits. Letter grades. Fee for mandatory field trip. B. Olson.

Explores the residential-development process from site acquisition through delivery of the finished product. Topics include market feasibility, land planning and acquisition, product selection and design considerations, project financing and feasibility, schedule and budgetary controls, contracting and construction issues, marketing, and sales activities. Current issues in providing competitive housing products in today's markets are also explored. Composition of the residential-development project team is discussed. Classes are supplemented by presentations from visiting professionals. The course includes a semester-long project based on an actual property and market opportunity.

CRP 659.18 (5850) Suburbia (also CRP 395.18 [3850])

Fall. 3 credits. Open to juniors, seniors, and grad students. A. Forsyth.

For description, see CRP 395.18.

CRP 659.19(5858) Health and Cities (also CRP 395.19[3850])

Spring. 3 credits. Open to juniors, seniors, and grad students. A. Forsyth.

For description, see CRP 395.19.

CRP 659.23 (5850) Community Urban Design Workshop (also CRP 395.23 [3850])

Spring. 4 credits. Open to upper-level undergrad/grads. A. Forsyth.

For description, see CRP 395.23.

CRP 661(6610) Seminar in American Urban History (also CRP 361[3610])

Fall or spring. 3 credits. Prerequisite: permission of instructor. M. Tomlan.

For description, see CRP 361.

CRP 662(6620) Historic Preservation Planning Workshop: Plans and Programs

Fall or spring. 1-4 credits. Prerequisite: CRP 561. M. Tomlan.

Preparation of elements of historic preservation plans, designs, legislation, and special studies. Individual or group projects are selected by students. Fieldwork is emphasized.

CRP 663(6630) Historic Preservation Law

Spring. 3 credits. Offered alternate years. Staff.

Covers law of historic district and landmark designation; tools for preservation (e.g., police power, taxation, eminent domain); and recent developments in state and federal historic preservation.

CRP 664(6640) Economics and Financing of Neighborhood Conservation and Preservation

Spring. 3 credits. Offered every other year. Staff.

The economic and financial aspects of historic preservation and neighborhood conservation. Topics include public finance, selected issues in urban economics, real estate economics, and private financing of real estate projects.

CRP 665(6650) Preservation Planning and Urban Change

Fall. 3 credits. M. Tomlan.

Examination of fundamental planning concepts and issues as they relate to historic preservation. Neighborhood revitalization, federal housing programs, the role of public and private institutions, displacement, and other social issues are among the primary topics.

[CRP 666(6660) Pre-Industrial Cities and Towns of North America (also CRP 360[3600], LA 260/666[2600/6600])]**CRP 668(6680) The History of Urban Form in America (also CRP 368[3680])**

Fall or spring. 3 credits. M. Tomlan.

For description, see CRP 368.

CRP 669.14(5850) The Museum and the Public (also CRP 395.14[3850])

Spring. 3 credits. J. Chusid.

For description, see CRP 395.14.

CRP 670(6700) Regional Planning and Development in Developing Nations

Fall or spring. 4 credits. Prerequisite: second-year graduate standing. Staff.

Extensive case studies of development planning are analyzed. Focus is on the political economy of the process of regional development through urbanization and in particular on the concepts of equity and efficiency, external economies, export linkages, and internal self-sufficiency and integration. Resource development, national integration, human development, and migration problems are discussed.

CRP 671(6710) Seminar in International Planning

Spring. 1 credit. S-U grades only. W. Goldsmith.

The international planning lecture series sponsors lectures by visiting scholars or professionals in the field of international development and planning. The only formal requirement for the course is a brief

evaluation of the series at the end of the semester.

CRP 672(6720) International Institutions

Spring. 3 credits. L. Benería.
Focuses on the growth and transformation of international institutions since World War II. The first part includes a discussion of the Bretton Woods institutions and of the U.N. system up to the early 1970s, and how these function and have evolved over time. The second part examines some of the crises and tensions within the international system since the 1980s and how these have affected institutional change and current debates on reform and global governance.

CRP 674(6740) Urban Transformations in the Global South (also CRP 474[4740])

Fall or spring. 4 credits. S-U or letter grades. W. Goldsmith.
For description, see CRP 474.

CRP 675(6750) Workshop on Project Planning in Developing Countries

Fall. 4 credits. D. Lewis.
Examines the problems and issues involved in preparing project proposals for presentation to funding agencies. Topics include technical design, financial feasibility, social-impact analysis, and policy relevance, as well as techniques for effective presentation of proposals. The course is organized as a seminar-workshop providing both an analysis of the critical elements of effective proposals and an opportunity to use those elements in the preparation of proposals. A multidisciplinary perspective is emphasized.

CRP 676(6760) Latin American Cities (also CRP 376[3760])

Fall. 3 credits. B. Lynch.
For description, see CRP 376.

CRP 677(6770) Issues in African Development (also CRP 477[4770])

Fall or spring. 1 credit. S-U grades only. M. Ndulo.
For description, see CRP 477.

[CRP 678(6780) Concrete Manifestations—Infrastructure in the New World Order]

CRP 683(6830) Environmental Aspects of International Urban Planning (also CRP 453[4530])

Fall. 4 credits. B. Lynch.
For description, see CRP 453.

CRP 686(6860) Planning for Sustainable Transportation (also CRP 386[3860])

Spring. 3 credits. S-U or letter grades. Staff.
For description, see CRP 386.

CRP 687(6870) The City in Brazil (also CRP 377[3770])

Summer. 3 credits. Letter grades optional. W. Goldsmith.
For description, see CRP 377.

CRP 689(6890) Sustainable Panama: An Interdisciplinary Workshop Course on the Future of the Panama Canal Metropolitan Landscape (also CRP 395[3850])

Winter. 4 credits. R. Trancik.
For description, see CRP 395 (section 1).

CRP 689.09(6890) Strategic Conservation Planning Workshop

Fall. 4 credits. Graduate workshop open to juniors and seniors. O. Amundsen.
Planners, natural resource specialists, and landscape architects are frequently called upon to create and implement land conservation plans. This interdisciplinary workshop course seeks to train the next generation of professionals in the theoretical frameworks, methods and techniques for undertaking regional land conservation planning efforts. As these planning efforts are highly individualized and technical, an applied approach will be taken with students working on an actual regional conservation plan for a client. The course links planning principles with the on-the-ground application of GIS technology, demographic analysis, land use planning, greenways development, and regulatory controls. The class will address the role of land conservation in communities facing social equity issues, wrestle with the complexities of public involvement in a planning process and debate the merit of voluntary programs vs. regulatory approaches to land conservation.

CRP 790(7850) Professional Planning Colloquium I (also CRP 390[3900])

Fall. 1 credit. Staff.
For description, see CRP 390.

CRP 791(8910) Master's Thesis in Regional Science

Fall or spring. 12 credits, variable. S-U or letter grades. Hours TBA. Regional Science faculty. Staff.

CRP 792(8920) Master's Thesis, Project, or Research Paper

Fall or spring. 10 credits, variable. S-U or letter grades. Staff.

CRP 794(7940) Planning Internships

Fall, spring, or summer. 12 credits, variable. Staff.
Combines a professional planning internship in a metropolitan area with academic study to provide experience and understanding of the planner's role in formulating and implementing plans and policies. Salaried internships in federal or state agencies, legislative offices, and comparable settings include development of research, analysis, and other technical skills. Weekly seminars draw on student field experiences, assigned readings, and guest speakers to examine current issues of federal, urban, and regional policy from the perspective of planning practice.

CRP 795(8950) Master's Thesis in Preservation Planning

Fall or spring. 6 credits, variable. Staff.

CRP 796(7960) Professional Writing and Publishing (Colloquium)

Fall or spring. 2 credits. S-U grades only. Not offered every year. Staff.
Individual and group projects culminating in the production of a professional journal.

CRP 797(7970) Graduate Independent Study

Fall or spring. 4 credits, variable.
Prerequisites: graduate student standing, permission of instructor. Staff.
For description, see department coordinator, 106 West Sibley Hall.

CRP 800(8000) Advanced Seminar in Urban and Regional Theory I

Fall. 3 credits. S. Christopherson.
Introduction to key conceptual and empirical literature in urban theory. Focuses on the relationship between political and economic processes and their joint influence on urban spatial form.

[CRP 801(8010) Advanced Seminar in Urban and Regional Theory II]

[CRP 810(8100) Advanced Planning Theory]

CRP 830(8300) Seminar in Regional Science, Planning, and Policy Analysis

Fall or spring. 4 credits, variable. S-U grades only. Staff.
Provides an opportunity to review some of the literature and current research in regional science, planning, and policy analysis. Specific topics covered vary each year. Empirical and analytical research are emphasized. Students are expected to prepare and present a research paper during the semester on some aspect of the topics under review.

CRP 890(8900) Planning Research Seminar I

Fall or spring. 2 credits. Staff.
Intended for doctoral candidates in city and regional planning; other students welcome. Presentation and discussion of current problem areas and research by advanced doctoral students, faculty members, and visitors.

CRP 892(9920) Doctoral Dissertation

Fall or spring. 2 credits, variable. Staff.

Special Topic Courses

Fall or spring. Variable credit. Staff.
Typical topics are:

CRP 609(6090) Urban and Regional Theory

CRP 619(6190) Planning Theory and Politics

CRP 629(6290) Quantitative Methods and Analysis

CRP 639(6390) Regional Development Planning

CRP 649(6490) Social-Policy Planning

CRP 659(6590) Urban Development Planning

CRP 669(6690) History and Preservation

CRP 679(6790) Planning and Developing Regions

CRP 689(6890) Environmental Planning

CRP 699(6990) Regional Science

CRP 719(7190) Planning Theory and Politics

LANDSCAPE ARCHITECTURE

Landscape Architecture at Cornell is jointly sponsored by the College of Agriculture and Life Sciences and the College of Architecture, Art, and Planning.

The Program

Program faculty: P. J. Trowbridge, chair (443 Kennedy Hall, 255-2738); M. I. Adleman, S. Baugher, K. L. Gleason, A. Hammer, P. Horrigan, D. W. Krall, L. J. Mirin, R. T. Trancik, P. J. Trowbridge.

Landscape Architecture offers a three-year master of landscape architecture license qualifying degree, administered through the Graduate School, for those who have a four-year undergraduate degree in another field. The major is composed of several parts: core courses related to professional education in landscape architecture; a concentration in a subject related to the core courses; and free electives. Requirements of the three-year M.L.A. curriculum include 90 credits, six resident units, satisfactory completion of the core curriculum courses, and a thesis or a capstone studio.

The department also offers a two-year master of landscape architecture advanced degree program, administered through the Graduate School, for those with accredited degrees in landscape architecture or architecture. The two-year program entails core courses in the discipline and the development of concentrations in subject-matter areas such as landscape history and theory, landscape ecology and urban horticulture, the cultural landscape, site/landscape and art, or urban design.

Both of these degrees are accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects.

Dual-Degree Options

Graduate students can earn a master of landscape architecture and a master of science (horticulture) or a master of city and regional planning simultaneously. Students need to be accepted into both fields of study to engage in a dual-degree program and must fulfill requirements of both fields of study. Thesis requirements are generally integrated for dual degrees.

Course Information

Note: All of the following courses are offered through the College of Agriculture and Life Sciences except LANAR 497, 524, and 525.

- LA 141(1410) Grounding in Landscape Architecture**
Fall. 4 credits.
- LA 142(1420) Grounding in Landscape Architecture**
Spring. 4 credits.
- LA 201(2010) Medium of the Landscape**
Fall. 5 credits.
- LA 202(2020) Medium of the Landscape**
Spring. 5 credits.
- LA 215(2150) Writing Seminar: Engaging Places**
Fall. 4 credits.

- LA 252(2520) Daily Life in Ancient Israel**
Spring. 3 credits.
- LA 261(2610) Fieldwork in Urban Archaeology (also CRP 261[2610])**
Fall. 4 credits.
- LA 262(2620) Laboratory in Landscape Archaeology (also ARKEO 262[2620])**
Spring. 3 credits.
- [LA 263(2630) American Indians, Planners, and Public Policy (also CRP 363/547[3630/5470], LA 547[5470])]**
- LA 266(2660) Jerusalem through the Ages**
Fall. 3 credits.
- LA 282(2820) Photography and the American Landscape**
Fall. 3 credits.
- LA 301(3010) Integrating Theory and Practice I**
Fall. 5 credits.
- LA 315(3150) Site Engineering I**
Spring. 3 credits.
- LA 316(3160) Site Engineering II**
Fall. 2 credits.
- LA 318(3180) Site Construction**
Spring. 5 credits.
- LA 360(3600) Pre-Industrial Cities and Towns of North America (also CRP 360/666[3600/6660], LA 666[6660])**
Spring. 3 credits.
- LA 401(4010) Advanced Synthesis: Project Design**
Fall. 5 credits.
- LA 402(4020) Integrating Theory and Practice II**
Spring. 5 credits.
- LA 403(4030) Directed Study: The Concentration (also LA 603[6030])**
Fall or spring. 1 credit.
- LA 410(4100) Computer Applications in Landscape Architecture**
Fall or spring. 3 credits.
- LA 412(4120) Professional Practice**
Spring. 1 credit.
- LA 418(4180) Audio Documentary: History/Stories from the Land**
Spring. 3 credits.
- [LA 483(4830) Seminar in Landscape Studies**
Next offered 2008–2009.]
- LA 486(4860) Placemaking by Design: Theory Seminar**
Fall. 3 credits.
- LA 491(4910) Creating the Urban Eden: Woody Plant Selection, Design, and Landscape Establishment (also HORT 491[4910])**
Fall. 4 credits.
- LA 492(4920) Creating the Urban Eden: Woody Plant Selection, Design, and Landscape Establishment**
Spring. 4 credits.
- LA 494(4940) Special Topics in Landscape Architecture**
Fall or spring. 1–3 credits.

- LA 495(4950) Green Cities (also CRP 384/584[3840/5840])**
Fall. 4 credits.
- LANAR 497(4970) Individual Study in Landscape Architecture**
Spring. 1–5 credits; may be repeated for credit. S-U or letter grades. L. J. Mirin.
Work on special topics by individuals or small groups.
- LA 498(4980) Undergraduate Teaching**
Fall or spring. 1–2 credits.
- LA 499(4990) Undergraduate Research**
Fall or spring. 1–5 credits.
- LA 501(5010) Composition and Theory**
Fall. 5 credits.
- LA 502(5020) Composition and Theory**
Spring. 5 credits.
- LA 505(5050) Graphic Communication I**
Fall. 3 credits.
- LA 506(5060) Graphic Communication II**
Spring. 3 credits.
- LANAR 524(5240) History of European Landscape Architecture**
Fall. 3 credits. L. Mirin.
Survey from classical times to the present, emphasizing design principles and techniques that have established the landscape architecture tradition in Europe. Particular reference is made to the manner in which gardens, streets, plazas, parks, and new towns reflect in their built form, a range of responses to demands of culture, economics, technology, security, the law, and ecology.
- LANAR 525(5250) History of American Landscape Architecture**
Spring. 3 credits. L. Mirin.
Landscape architecture in the United States from Jefferson to the present is examined as a unique expression of the American experience. Influences exerted by the physical landscape, the frontier and utopian spirit, and the cultural assumptions of democracy and capitalism are traced as they affect the forms of urban parks, private and corporate estates, public housing, transportation planning, national parks, and other open-space designs.
- LA 545(5450) The Parks and Fora of Imperial Rome**
Spring. 3 credits.
- [LA 569(5690) Archaeology in Preservation Planning and Site Design (also CRP 569[5690])**
Spring. 3 credits. Next offered 2008–2009.]
- LA 580(5800) Landscape Preservation: Theory and Practice**
Fall. 3 credits.
- LA 582(5820) Photography and the American Landscape Architecture**
Fall. 3 credits.
